

# FlexLED

Flexible LED Tape

RGBA: LUMA

Our RGBA: LUMA FlexLED tape produces a high output RGB+Amber mixture of colors. Designed specifically for on-camera use or anywhere high-quality, beautiful white light is required. Its low profile and flexible format provides a reliable LED fixture in an extremely compact form factor.

Factory standard reels are 5 meters in length but can be customized to any length between 10cm and 5 meters. Our FlexLED family of LED strips come with locking 5-pin waterproof connectors, however bare wire is also connection options.

Because of their flexible and small format, these are ideal for a number of applications including inside light boxes, under cabinets, under shelving, inside of vehicles, under steps, and virtually an unlimited number of other applications. These strips are designed to be used inside of all of our aluminum channels which provide a host of other options for mounting and hanging options.

Please visit our website or give us a call for more information.
