- Dimensions: 12" x 6" x 1.7"
- Weight: 1lb
- 1-year warranty

DESCRIPTION

The time display is 2.3" tall and the calendar display is 1.5" tall with AM and PM indicator lights. The Digital LED Calendar Clock is a perfect gift for anyone that can use a large bright display but not an extremely large, space consuming unit, including an aging parent, relative or friend especially anyone with low or impaired vision. The 16 alarms/reminders capability is unique and will help anyone manage their time. The fully functional remote makes setting easy. The unit will stand upright on a table or can easily be hung on the wall. The AC adapter (included) plugs into a recessed outlet on the back so the clock will hang flat and even.
