

# 10 Zone Underfloor Wiring Centre HIQ 101

The underfloor wiring centre is the interface between your wall thermostats and the heating system on either your underfloor system or manifold radiator system.

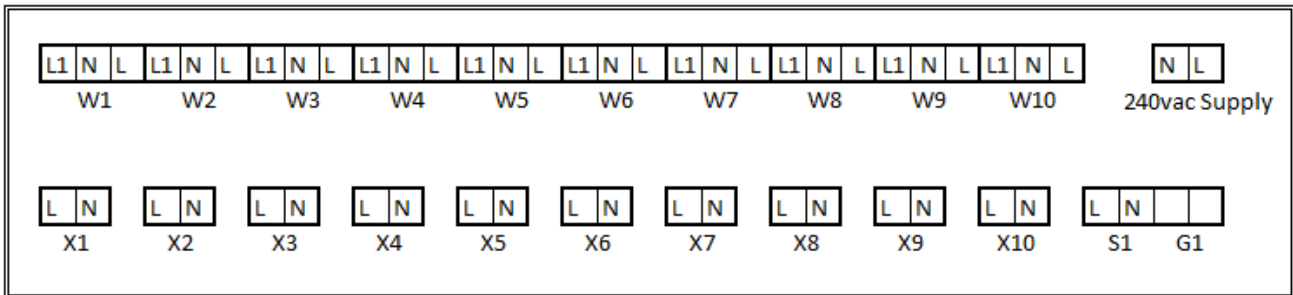

## Product Features

- Unit can control up to 10 independent actuators (zones).
- Separate outputs for boiler or zone valve and pumps.
- LED indication for each zone, pump/boiler output and power input.
- Integrated timer to prevent pumps running while actuators are opening.

## Technical Data

Voltage.....	240Vac 50Hz
Relay Output Current.....	5A max
Ambient temp.....	-20 ~ 60 deg C
Storage Temp.....	-20 ~ 70 deg C
Unit dimensions.....	200 x 100 x 34mm
Colour.....	White

## Electrical connections

- W1 – W10 : Thermostat connections.
- X1 – X10 : Manifold actuator connections.
- S1 – Circulating pump connections.
- G1 – Volt free relay contacts for boiler or zone valve connections.

For individual wiring diagrams for every system please see the PDF library at [www.heatiq.co.nz](http://www.heatiq.co.nz)
