

BATLSKIN MPAS

EVALUATION & FEEDBACK FORM

You have been asked to provide feedback on the Galvion Batlskin Head Protection system. This system as shown in the picture above will give the soldier the flexibility to select the right components for his operational needs. For example, the Front Mount will hold NODs devices, and is the mechanism for attaching a ballistic visor and mandible guard.

Please use the Batlskin Head Protection System multiple times in as many different situations as possible to generate your feedback and evaluation.

Your testing of the system with your current NODs gear, weapons and other equipment is specifically what we are interested in hearing about at this time. We're looking forward to incorporating your opinions into our formal feedback loop to ensure that we are constantly improving our products to offer you the best protection possible for your missions.

 $Please \, complete \, this \, question naire \, (using \, the \, instruction \, booklet \, for \, reference \, as \, necessary) \, and \, scan \, it \, back \, via \, email \, to \, evals \, @ \, galvion.com.$
