

BATLSKIN FRONT MOUNT

FEEDBACK FORM

You have been asked to provide feedback on the Galvion Batlskin Front Mount. This system should allow you to attach Night Vision Goggles (NVGs), visor, mandible guard and other head borne equipment to your helmet securely and easily.

Please use the Batlskin Front Mount in as many different situations as possible to generate your feedback and evaluation.

Testing of the system with your current NODs gear, weapons and other equipment is specifically what we are interested in hearing about at this time. We're looking forward to incorporating your opinions into our formal feedback loop to ensure that we are constantly improving our products to offer you the best protection possible for your missions.

Please complete this questionnaire (using the instruction booklet for reference as necessary) and scan it back via email to evals@galvion.com.
