PICTURE FRAME SIZES GUIDE

To help you understand this guide, please read below information:

Image size: The sizes stated means an image of that size will fit into the frame. E.G.- an 8" x 10" image fits perfectly into an 8" x 10" frame.

Window Size: The window size tells you approximately the area of the image that will be displayed at the front of the frame. Around 5-8mm of each side the image will be hidden in the rebate of the frame.

For Frames with Mat boards, 3mm of each side of the image will hidden behind the mat board.

External Size: This is the overall size of the frame to help you determine if it will fit in the area of your wall.

Weight: The weight of each frame is approximate. Recycled timber will vary in weight which can be noticeable in larger frames.

Our frame sizes may vary by a couple of millimetres as they are hand made and due to the nature of the recycled timber we use.
