Scanning with Raven Desktop

4.1 Home screen shows available workflows, scan settings and destinations. Create custom workflows by clicking the
→ button.

4.2 Click the ADVANCED button to choose additional scan settings.

4.3 Set up and manage destinations by clicking the MANAGE button. Click the button to save to folders on your computer.

5 Tips for Seamless Scanning

5.1 Insert your document **FACE UP** to the feeder and align it to the left edge of the feeder slot.

5.2 Slide the guide lever against the right side of the document to ensure straight scanning.

5.3 Gently push the original into the feed slot, release it as soon as it begins to feed. After the feed begins, the scanner pauses briefly and then continues the feed.

5.4 Keep the document flat and level when feeding to prevent jamming.

5.5 Wait until the indicator light stops blinking before inserting and scanning the next document.

Raven Scanner

Go

(USB)

6 Important!

6.1 Insert only one page at a time, and insert the next page only when the previous one is done. Otherwise, the scanner may malfunction.

6.2 Do not push or force your document into the feeding slot or the top of your image will be cut. Simply insert and let go of the document when it begins to feed into the slot.

6.3 Remove items such as staples, paper clips and sticky notes before feeding into the scanner to prevent damage.
