RING SIZER TOOL

Before printing:

- + Make sure the page scaling is set to 100% in your printer settings area.
- + Compare your ruler to the ruler to the right. The marks should match.
- + If the measurement isn't accurate, review your print settings again.

Method 1

In order to be 100% accurate with your ring sizing, we recommend visiting a jeweler. Any professional jeweler should be able to help you find the perfect ring size. You can also setup an appointment to visit our studio - text us at 816-281-7442.

Method 2

Do you have a current ring that fits really well? Place that ring on one of the circles below. For the proper fit make sure that the black circle is visible within your ring. That will be your ring size. To double-check, place your ring on the next largest size and you should not be able to see the entire black circle.
