Modern and sleek design with a newly re-tooled bottom plate for a slimmer and sleeker finish. The Trinity ceiling fan blends a modern design with aerodynamic performance for an elegant cooling solution in contemporary spaces.

High performance cooling thanks to the powerful DC motor paired with aerodynamic fluted blades, effectively moving large volumes of air directly below and around larger spaces - ideal for even the hottest climates.

Moulded aerodynamic blades are crafted from polymer (a high-grade plastic) which are durable, easy to clean as well as being safer and quieter than metal blades.

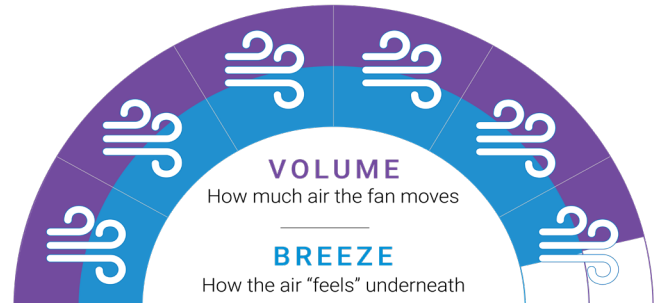

Highly efficient airflow made possible by the energy-efficient DC motor, using only 34W on high and as little as 5W on low so you stay cool for less.

Enjoy whisper-quiet cooling, thanks to the combination of a silent DC motor and premium polymer blades, so you stay cool with less wind noise and fan noise.

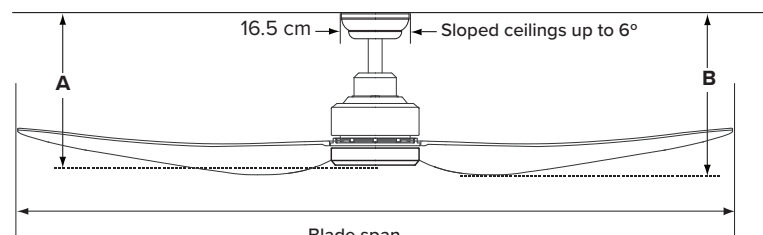

Perfect for both Indoor & Outdoors so you can maintain your decor style from your living room through to your alfresco outdoor area.
