

# VEHICLE GEAR

Looking for secure storage while retaining payload in your truck? Try the **DECKED STORAGE** system. It preserves the footprint of your truck's bed, provides two waterproof drawers to store gear, and carries a 2,000-pound payload on top so heavy items can be transported. Add in the new D Box storage container for small-item storage like binoculars or reels. **\$1,100; [decked.com](http://decked.com)**

With a generous bed platform of 56x122 inches and an interior height of 52 inches, **THE TEPUI AUTANA SLEEPS BIG**, but folds small—only occupying a footprint of 56x48x12 inches, fitting on nearly any vehicle. A generous overhang and an additional hanging vestibule (not shown) provide a dry place to store gear or change clothes. **\$2,125; [tepu.com](http://tepu.com)**

Jeep freaks: Organize and secure your load with Truck Vault's most popular option: the Magnum One Drawer. Available with or without power ports (110V/12V) and custom multiple drawer options, the Magnum stores gear—**ORGANIZED AND SAFE**—and can be had with diagonal dividers that are long enough to store a scoped M4 carbine. **\$1,395; [truckvault.com](http://truckvault.com)**

If you have an ATV, you likely have realized **STORAGE CAN BE AN ISSUE**. Racks are great for bulky items, but to keep small items at hand, a stock ATV leaves a bit to be desired. The Plano Rear Mount Storage Box is made from durable plastic and fits on a wide variety of rear racks. A foam seal keeps out dust and deters water while the full-length steel hinge allows easy access. **\$100; [planomolding.com](http://planomolding.com)**
