RECOGNIZED
BY THE WHOLE WORLD

National High-tech Enterprise

GB

Smart Toilet Standard Drafting Unit

TOP10

China Top 10 Smart Bath Brand

excellent product certification

National Quality Outstanding Enterprise

China Smart Bath Product Gold Award

Certificate of compliance

Member Japan SIAA organization, VIP NO: 2342

FCC Part 15C

Business Social Compliance Initiative

uniform plumbing code

Electrical Testing Laboratories

IECEE Certification Bodies

Restriction of Hazardous Substances

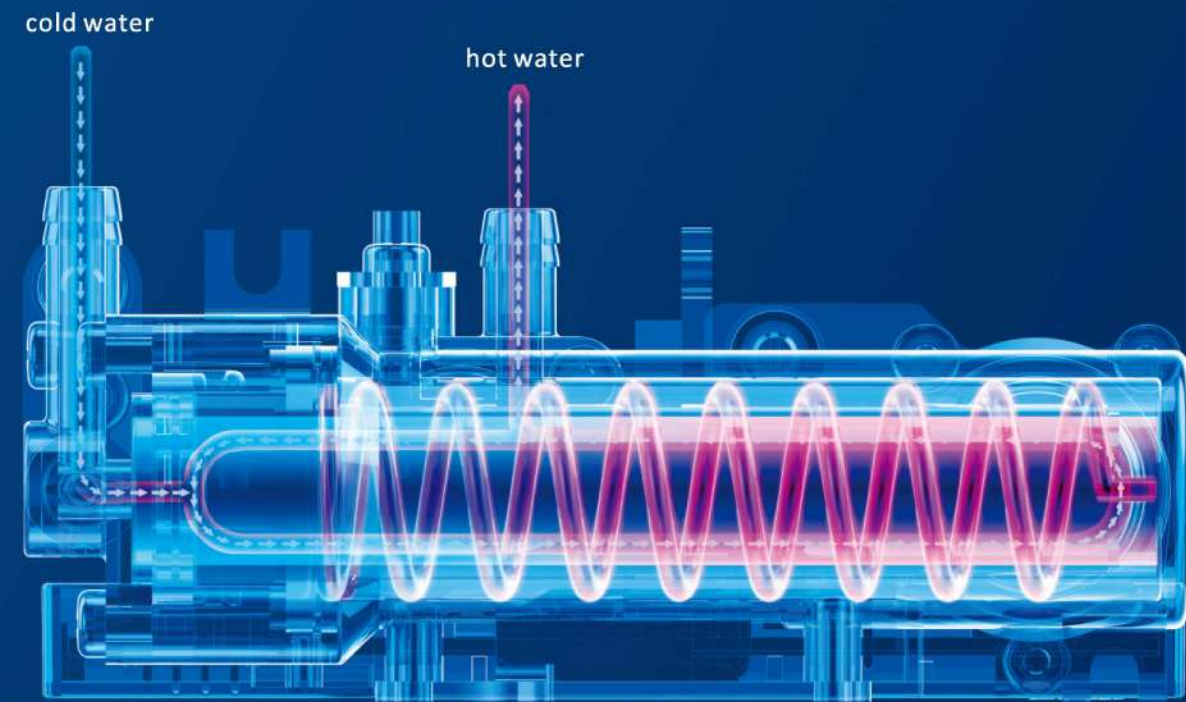

for plumbing and drainage products

Safety + EMC + Importer Declaration

IT IS HOT IMMEDIATELY, THE WATER TEMPERATURE IS CONSTANT

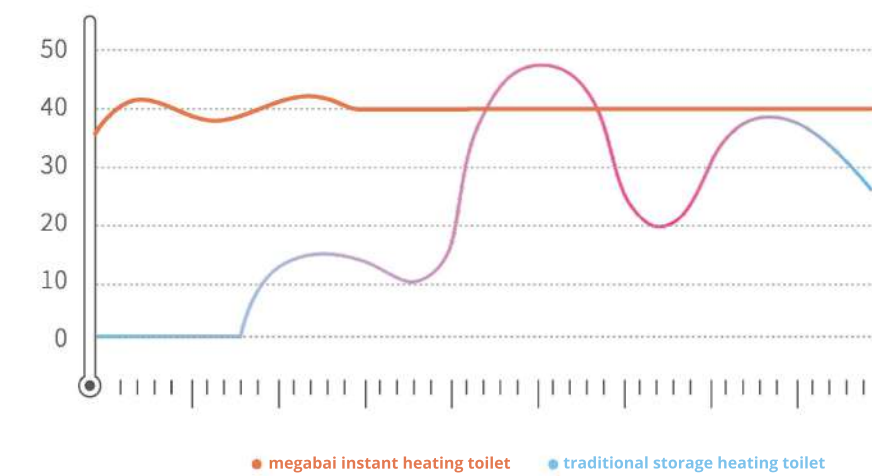

Tankless instant heater design, clean, energy-saving, more healthy

Built-in ceramic core heater, using water & electricity separation tech, instant heating, safe and less hidden dangers

LEAD, NEVER FOLLOW

FRESH WATER, INSTANT HEATING

Fresh Water, instant heating, constant water temp.
National patented 6th generation Tankless 3D stereo fresh water instant heating system.
water & electricity separation safe and less hidden dangers

instant heating, no need to wait, constant water temp is more comfortable

tankless, leading less bacterial breeding. Fresh warm wash water is more healthy

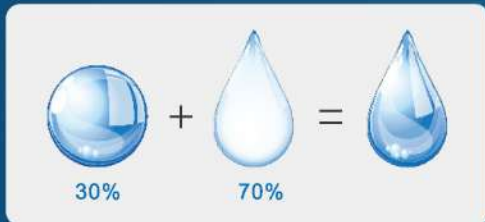

No need to heat in advance, heating while using is more energy-saving.

Always warm water cleansing, no need to wait, water temperature control accurately
Always fresh water and constant temperature, tankless design, no bacterial breeding
Always clean and power saving, water and electric separated, security.

air suck-in

Using the Venturi effect, the wash nozzle sucks air while cleaning, giving more active oxygen to fresh water, the wash water is softer and more delicate.

Air coming-in diagram, the air is naturally sucked in.

Warm water combine with air, bring customers super soft aerated bubble wash experience.

SOFT OXYGEN KINETIC ENERGY TECHNOLOGY

Aerated bubble wash tech

water + air

bubble wash (like SPA)

The water is powerful but also gentle, does not sting the skin.

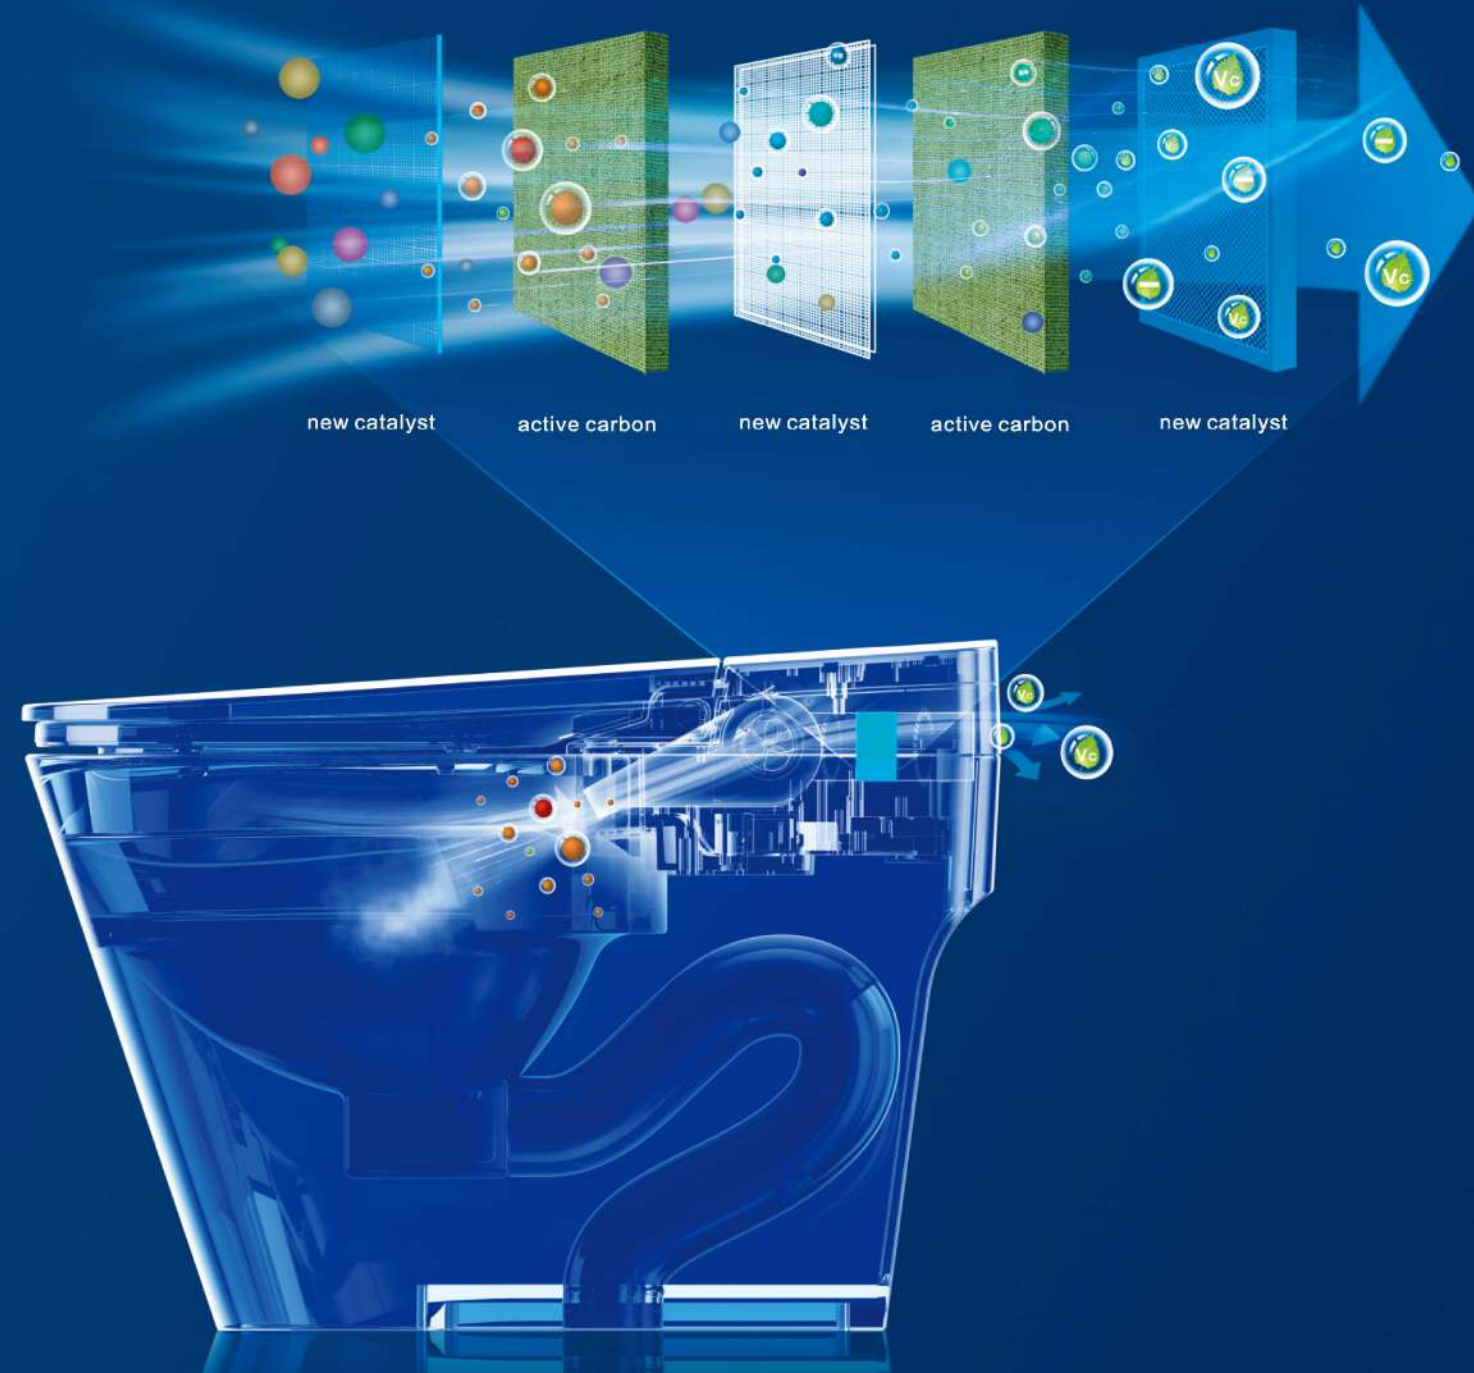

When the bubble bursts, it can take away the dirt in time and clean it more thoroughly.

Using the national patent soft oxygen kinetic energy technology, using the Wen's principle, naturally inhaling during the cleaning process, allowing air and water (3:7) to combine, incorporating countless water bubbles into the water column, giving the living water more oxygen, soft water. More delicate, super soft bubbles, truly enjoy the smart toilet wash SPA tour.

TOILET AIR PURIFIER

Double filtration, purify odor, decompose bacteria, and effectively remove odor, leave bathroom with fresh air.

new smart toilets, using advanced "active oxygen deodorization tech" new chemical catalyst added use the auto sterilization deodorant device chemical reactions could be carried out Releasing some oxygen, Create a fresh and natural bathroom environment.

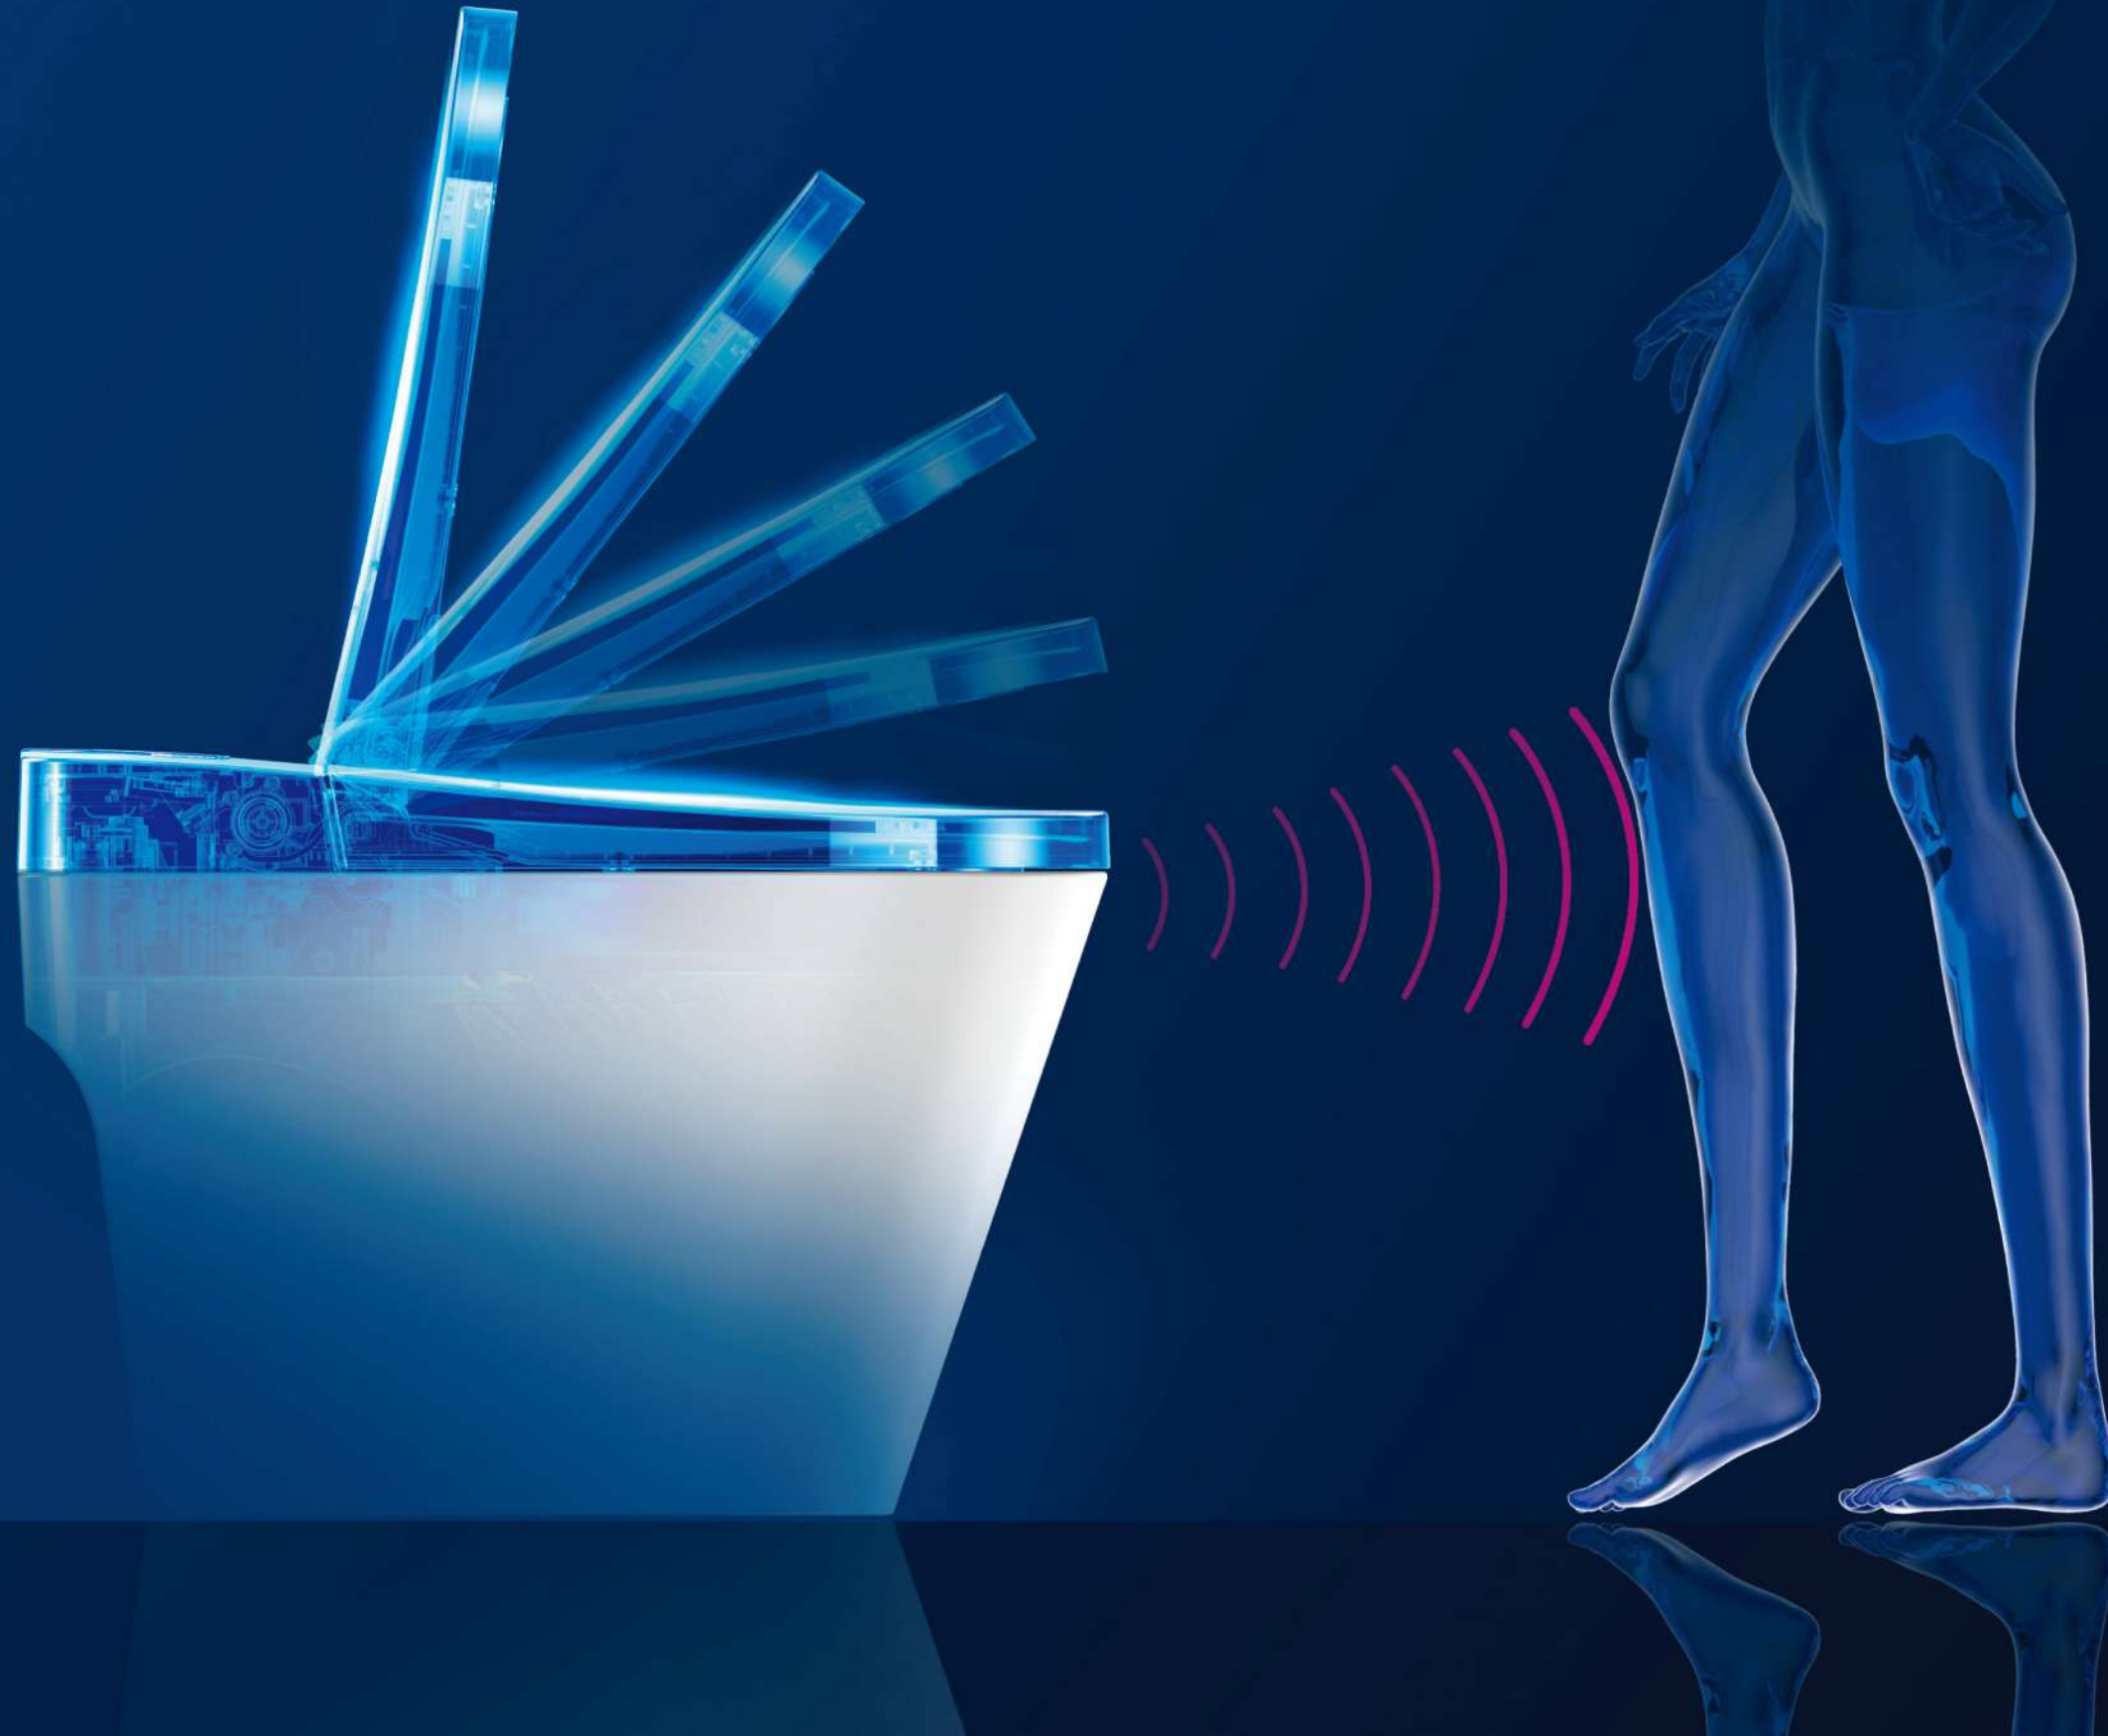

SAFETY AND ENERGY PROTECTION SYSTEM

10 core safety protections

Multiple insulation of the seat ring, water and electricity isolation of the heating pipe to prevent electric shock; precision leakage protection plug, light leakage immediately cut off the power supply to prevent leakage; high-precision temperature control system, multiple over-temperature protection, to prevent high temperature and burn-proof.

RECOGNIZED
BY THE WHOLE WORLD

RECOGNIZED BY THE WHOLE WORLD

fully-automatic inducing system

fully-automatic inducing auto open toilets (Radar wave induction),
thoroughly free your hands

The new generation of full auto open tech, recognizing your body precisely
Auto open/close seat cover, releasing your hands
Using international leading tech of worm and dual damp, open and close
smooth and stable.

While getting close
to a smart toilet, the
seat cover auto open.

After sitting down, the
machine starts working
(auto deodorizer, nozzle
self-cleaning etc.)

When standing up, the
machine flush automatically.

After leaving sensor area,
the seat cover auto close.

ONE SOLUTION

One solution, easy and convenient

COLORFUL BREATHING LIGHT TECH

One solution match with the breathing light, color change slowly like you are breathing, colorful and beautiful

One solution, easy and convenient

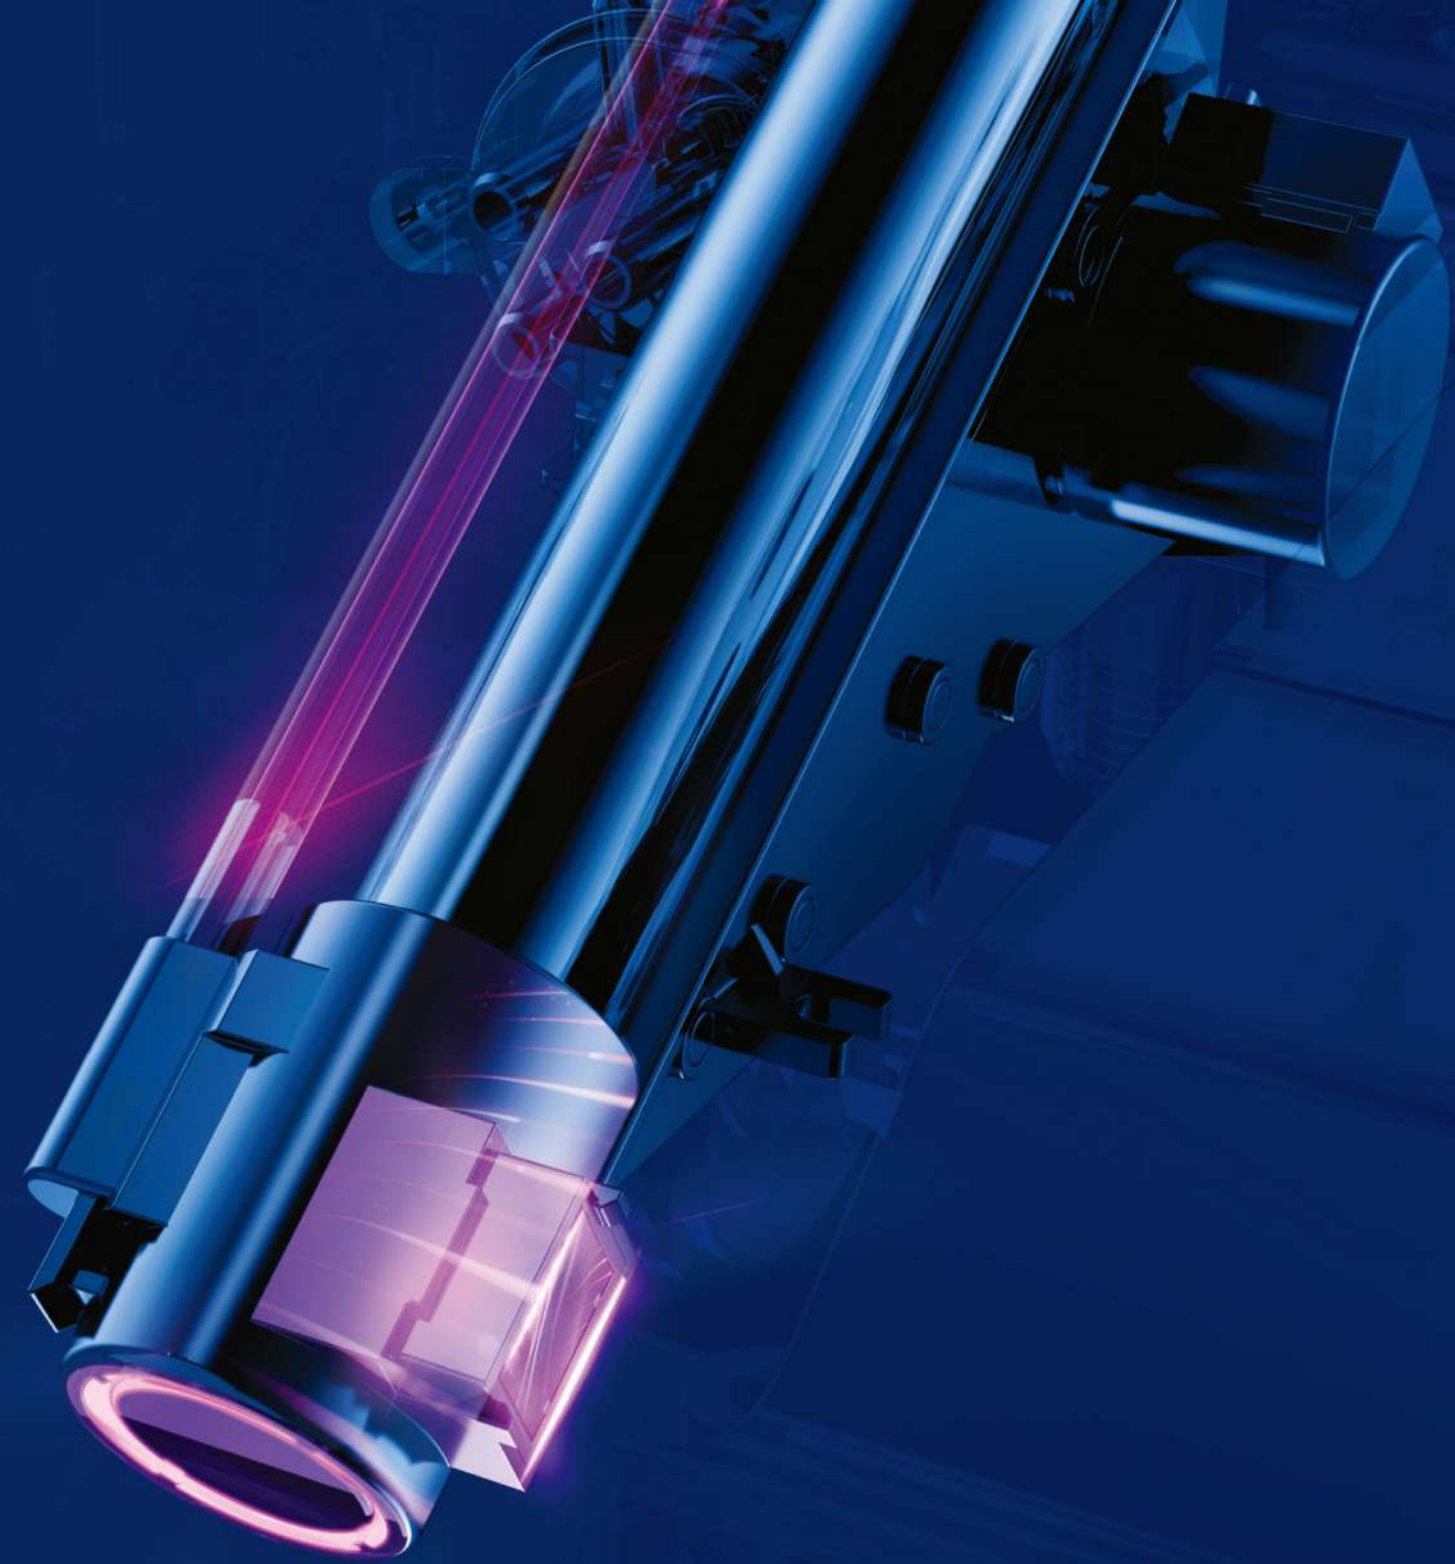

Clockwise: one solution service for lady: front wash + dry+ auto flush

Counterclockwise: one solution service for rear: rear wash +dry +auto flush

Click once: start flushing

Double click: Start water saving flushing

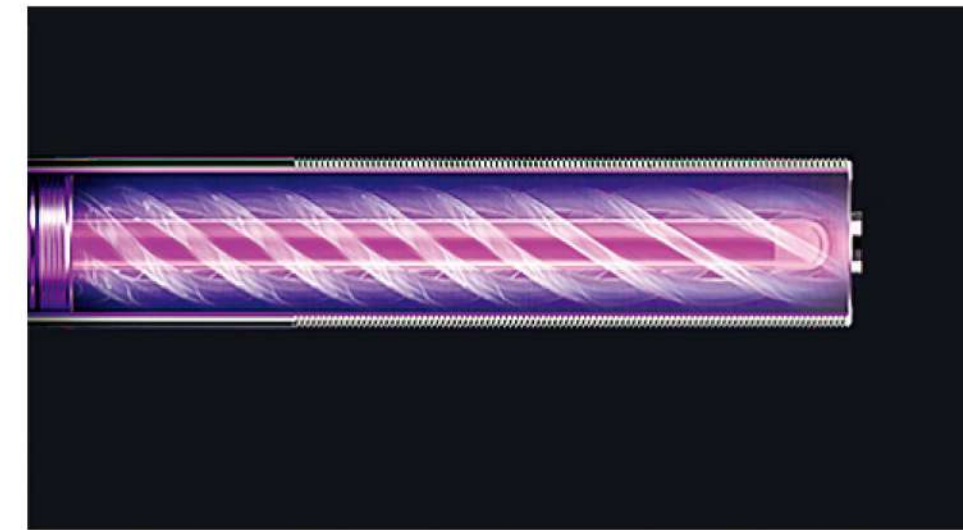

UV LIGHT STERILIZATION FOR NOZZLES

AND UNEXPECTED CREATIVITY

UV sterilization for nozzles

The nozzle adopts UVC band and deep ultraviolet light with a 275nm wavelength physical sterilization, the sterilization rate is up to 99.99%, double sterilization before and after effluent, which is more cleaner and safer.

E.coli

Salmonella

Staphylococcus aureus

Candida albicans

Give more protection to health

With medical grade UVLED sterilization function, #316 stainless steel integrated cleaning nozzle. Before and after rinsing, the annular water stream will thoroughly clean the nozzle; after leaving the seat, the ultraviolet light will effectively kill the bacteria on the nozzle.

WARM AIR DRYING

350W high-power drying system, ergonomically designed for wind pressure, strong power and strong wind drying effect quick and dry.

316 STAINLESS STEEL NOZZLE

The nozzle is made of 316 stainless steel and added with MO element to improve the corrosion resistance and high temperature strength of the nozzle, to prevent bacterial growth.

One nozzle, three washing experience

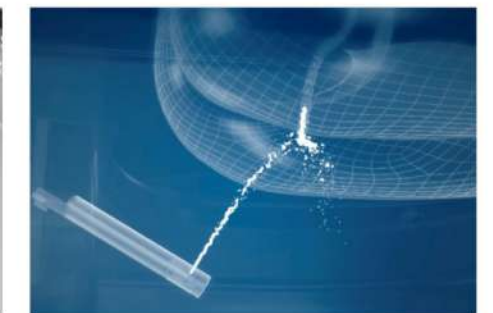

Three different waterways design, giving you different cleaning experience according to your different needs

Front wash:
Contains a lot of bubble while cleaning, specially designed for women

Rear wash:
Wash your hips with warm water to keep your hips refreshed

Powerful enema wash:
Powerful laxative function, cleaning water column concentration, thereby stimulating the sphincter laxative, the water pressure intensity can be adjusted according to your own experience during use.

SUPER SWIRL CAN SILENCE THE RAPID WATER FLUSHING SYSTEM

The new super-swirl processing technology uses Venturi supercharging combined with tankless constant flow technology. The flushing force is strong and powerful, the impulse is stable, and the noise is low. The cylinder is cleaned in all directions, and the flushing effect is good, leaving no dead ends. The whirlpool siphon, the speed of the water, completely washed away without returning. Reduce the extreme flushing noise and disturb the family's sleep. At least 1L of water can be saved for each flush.

FOOT SENSOR FOR FLUSHING

According to the men's toilet habits, designed for men, you can achieve the flushing function by your feet. You don't need a remote control, you don't have to bend over.

BAI 1001

Dimension: 660x395x493mm
 Rough-in: 305/400mm
 Water Pressure: 0.1 Mpa (dynamic) - 0.75Mpa (static)
 Rated Voltage: AC220V/AC110V 50Hz/60Hz
 Color: Ivory white
 Flushing Method: Siphon Jet Flushing
 Heating method: Instant heating
 Seat cover material: PP fireproof soft close seat cover
 water consumption: 4.8L / 1.28 GPF
 Drainage Pattern: S-trap

• **Special Features**

Aerated bubble wash, 316 Stainless Steel Self-cleaning nozzle, UV sterilization tech, SIAA antibacterial thermostatic seat, Enema SPA wash, foot sensor for flushing

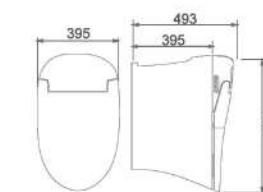

• **Core Tech**

6th generation Tankless 3D stereo fresh water instant heating tech, aerated bubble wash tech, UV sterilization tech

• **Remote Control**

• **Installation Dimension Diagram**

BAI 1002

Dimension: 682x380x480mm
 Rough-in: 305/400mm
 Water Pressure: 0.1 Mpa (dynamic) - 0.75Mpa (static)
 Rated Voltage: AC220V/AC110V 50Hz/60Hz
 Color: drawbench silver
 Flushing Method: Siphon Jet Flushing
 Heating method: Instant heating
 Seat cover material: PP fireproof soft close seat cover
 water consumption: 4.8L / 1.28 GPF
 Drainage Pattern: S-trap

• **Special Features**

Aerated bubble wash, 316 Stainless Steel Self-cleaning nozzle, UV sterilization tech, Enema SPA wash, foot sensor for flushing, Auto open/close

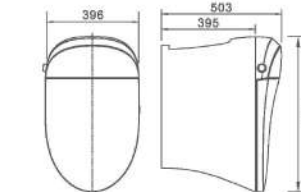

• **Core Tech**

6th generation Tankless 3D stereo fresh water instant heating tech, aerated bubble wash tech, UV sterilization tech

• **Remote Control**
