### Step One

#### Create a safe(r) environment.

Pre-fog the complete area easily and quickly with the new **SF DeCon Fogging device** and the recommended DeCon chemical®. When used in conjunction with heated dry steam; the biocide particles are small enough to kill pathogens on surfaces, including ceilings and walls as well as furniture, equipment and floors.

### Step Two

#### Steam clean as normal.

Using the correct tool and microfibre, steam-clean the entire environment and equipment as per the ODC Standard Operating Procedures (SOP) ensuring high traffic areas are specifically targeted.

### Step Three

#### Complete the disinfection and decontamination.

Use the **SF DeCon Fogging device** and the recommended DeCon chemical® over the entire environment once more if required.

One application-  
500ml of disinfectant  
dilution - covers up to  
150m<sup>2</sup> of surfaces in  
10 minutes
