

From beginners to exacting enthusiasts, CannonKeys is excited to bring to market the accessories and peripherals that our customers are looking for.

As shared in our [blogpost](#), this initial run of our coiled cables are being offered at a substantial discount due to a few imperfections. We fully stand behind the reliability and durability of these cables, and we're excited to offer this run with significant savings.

Below, we've shared some images of what cosmetic imperfections may be present on a coiled cable.

Acceptable Blemishes:

<p><i>Paint chip debris</i></p> 	<p><i>Minor abrasions on molded ends</i></p> 	<p><i>Loose screws</i></p> 
<p><i>Minor chips and dents</i></p> 	<p><i>Minor chips on connector</i></p> 	<p><i>Minor fraying of cable</i></p> 

We're confident these minor blemishes won't impact the durability, longevity, and general day-to-day use and enjoyment of the cable.

If you are unhappy with the quality of the product you receive, please share photos with support@cannonkeys.com. We can't guarantee we'll replace your product - but we promise we'll give it a second look to see if we made a mistake, or if you were sent a defect that passes the bar.
