

Electrolytes Plus Energy

Use as a high energy, quick mixing, nutritional supplement for young calves in need of electrolyte therapy. Fortified to quickly replenish energy and electrolytes lost during periods of stress, heat or scours.

Ingredients & Benefits

Dextrose	Provides calf with needed energy, allows for faster absorption of electrolytes and water, and improves flavor.
Sodium	Creates a synergistic effect with glucose, water, and electrolytes. Is an essential electrolyte for usual body functioning.
Bicarbonate	Aids in the correction of metabolic acidosis and absorption of potassium.
Sodium Citrate	Enhances the absorption of water and electrolytes, corrects the pH balance within the gut.
Kaolin	Provides protective coating to the stomach, protects the villi from further damage, absorbs toxins, aids in the calf's recovery.
Potassium Chloride	Essential electrolyte for normal body function.

Electrolytes Plus Energy

Guaranteed Analysis

Salt, (NaCl) Minimum	6.5%
Salt, (NaCl) Maximum	7.5%
Sodium, Minimum	4.5%
Potassium, Minimum	1.5%
Dextrose, Minimum	50%

Ingredients:

Dextrose, Maltodextrin, Sodium Chloride, Sodium Bicarbonate, Sodium Citrate, Potassium Chloride, Magnesium Sulfate, Citric Acid, Ascorbic Acid, Calcium Pantothenate, Kaolin.

Mixing & Feeding Directions

Mix 3 heaping scoops with 2 quarts of warm water.
Feed once a day per calf
Feed milk replacer per milk replacer schedule.

Moderate need of Electrolyte Fluids

Mix 3 heaping scoops with 2 quarts of warm water.
Feed two times a day per calf.
Feed milk replacer at half the recommended level.

Use as a high energy, quick mixing, nutritional supplement for young calves in need of electrolyte therapy. Fortified to quickly replenish energy and electrolytes lost during periods of stress, heat or scours.
