

Paper Finger Mice

1. Print and copy the pieces to patterned paper. Cut out each piece.
2. Curl the tail and bend up the ears.
3. Roll the body piece to create a cone. Glue or tape into place.
4. Glue the ears to the top of your cone, like a little headband.
5. Glue the curled tail to the inside edge or the cone base.
6. Glue the whisker piece onto the top of the cone point. Make three snips into each side to create whiskers.
7. Roll the rectangular piece and glue securely. Glue it into the inside of your mouse - this is for your finger.
8. Draw or paint two eyes and a nose.
9. Voila! A lovely little mouse friend for you :)
