

200% More Light and Virtually UNBREAKABLE*

- **Waterproof to 100 ft**
- **7,000+ Lumens (4 foot)**
- **50,000 Hours LED's Life**
- **No Hazardous Materials**
- **360 & 270 Degrees Light**
- **Safe - DC Powered**
- **Cables up to 100 feet**
- **Lift and Anchor Points**
- **Optional Vertical Light Stand**

- **Save Work Time!**
- **No Mixed Waste Issues**
- **Safe for Confine Spaces**
- **Improve Quality of Work**
- **Safer for FME Areas**
- **Many Applications!**
- **VERY Cost Effective!**
- **4, 2, 1 Foot Models Available**
- **Stock all sizes**

Conventional fluorescent tube stick lights are fragile by design and typically break even during light industrial use. This creates many issues such as disposing of hazardous material (fluorescent tubes contain mercury which requires special disposal process), loss of work time to get a replacement light, and creates an unsafe work area due to sudden loss of light. Our patented (# 9,310,067) LED Sticklights solve all of those problems PLUS provides more than twice the amount of light, waterproof to 100 feet deep, can operate over 5 years non-stop, all in a compact impact resistant polycarbonate housing*. To demonstrate their ruggedness, we produced a video and posted it on LEDStickLights.com.

**LED vs. Conventional
Fluorescent Tube Sticklight**

**LED DC Powered (shown) vs.
Fluorescent Tube AC Powered**

**Attachment Points for
Optional Eye Nuts, Hooks, Stand**

Light Models

Area Work Light - 360° of Light: Designed for lighting entire rooms, tanks, pipes, and other work spaces. Light on all sides and best used where orientation of the light does not matter.

Inspection Light -270° of Light: Design for inspection activities where you do not want light to shine back in your face.
