Results Overview for Example Client

Grains and Staples

Grains make up a large proportion of the traditional western diet. Most people will eat some form of Grains or Staple ingredients with each meal. If you have reactions to any grains that you eat regularly, it is important that you discuss suitable replacements with your Brunel Health Practitioner.

Your reaction to Grains and Staples

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Barley	0	Gluten	3	Wheat	2
Brown Rice	0	Oats	0	White Rice	0

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 6 Grains and Staples, and has identified more than 1 food specific IgG reaction to the antigens tested.

If you have any questions or concerns about your Grain or Staple intake, you should speak with the practitioner that arranged the test for you.

Notes

Dairy and Eggs

Dairy and Eggs are commonly consumed not only as standalone foods but also as the base for many recipes. Both provide crucial vitamins and minerals, essential amino acids and are also sources of protein and fats. If you have any reactions in this category, your Brunel Health Practitioner will recommend suitable alternatives, to ensure you are still following a diet with adequate nutritional balance.

Your reaction to Dairy and Eggs

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Goat Milk	0	Casein	0	Egg White	0
Sheep Milk	0	Whey	0	Egg Yolk	0
Cow Milk	0	Whole Egg	0		

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 8 dairy products. There were no food specific IgG reactions to any of the antigens tested.

If you have any questions or concerns about your Dairy or Egg intake, you should speak with the practitioner that arranged the test for you.

Notes

Meat and Fish

Meat and Fish are eaten regularly by most as part of a varied diet. Meat and Fish products provide a source of protein, vitamins and minerals and essential fatty acids. If you have any reactions in this category, you should discuss suitable alternatives with your Brunel Health Practitioner.

Your reaction to Meat and Fish

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Beef	0	Cod	0	Salmon	0
Chicken	0	Crab	0	Sardine	0
Duck	0	Haddock	0	Shrimps	0
Lamb	0	Lobster	0	Trout	0
Pork	0	Mackerel	0	Tuna	0
Turkey	0	Prawns	0	Crayfish	0

Action Needed

Cherry	0	Olive	0	Sultana	0
Cranberry	0	Orange	1	Watermelon	0
Grape - Red	0				

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 25 fruits, and has identified a food specific IgG reaction to one of the antigens tested.

If you have any questions or concerns about your fruit intake, you should speak with the practitioner that arranged the test for you.

Notes

Drinks

IgG reactions can be triggered by drinks as well as foods of course. Most people consume hot and cold beverages on a daily basis, so it is important to act on results within this section if any reactions are shown. Your Brunel Health Practitioner will help with suggestions of suitable replacements.

Your reaction to Drinks

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Almond Milk	0	Coffee	0	Oatmilk	0
Black Tea	0	Green Tea	0	Rice Milk	0
Cacao	0	Hazelnut Milk	0	Soya Milk	0
Cashew Milk	0	Hemp Milk	0	White Tea	0
Coconut Milk	0				

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 13 drink types. There were no food specific IgG reactions to any of the antigens tested.

If you have any questions or concerns about your drink intake, you should speak with the practitioner that arranged the test for you.

Notes

Protein Supplements

For those partaking in a physical training regime, or for people looking to increase their protein intake, Protein Supplements are a popular choice. Often consumed daily, reactions to these supplements can occur. If you have any reactions in this section, your Brunel Health Practitioner will recommend suitable replacements.

Your reaction to Protein Supplements

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Casein Protein Isolate	0	Pea Protein Isolate	0	Soy Protein Isolate	0
Hemp Protein Isolate	0	Rice Protein Isolate	0	Whey Protein Isolate	0

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 6 protein supplement types. There were no food specific IgG reactions to any of the antigens tested.

If you have any questions or concerns about your protein intake, you should speak with the practitioner that arranged the test for you.

Notes

Other

Sometimes overlooked are the small ingredients and flavourings that go into our everyday food and drink preferences, for example, Yeast and Vinegar which are consumed daily by most people. Identifying consumption of ingredients in this category may involve looking at the ingredients included in any pre-made or packaged foods. Your Brunel Health Practitioner will help you to identify these and will recommend suitable alternatives.

Your reaction to Other

Food Type	Reaction Level	Food Type	Reaction Level	Food Type	Reaction Level
Baker's Yeast	0	Hemp	0	Mustard	0
Balsamic Vinegar	0	Hops	0	Vanilla Essense	0
Brewer's Yeast	0	Lentils	0	Wheatgrass	0
Citric Acid	0	Malt Vinegar	0		

Action Needed

The laboratory reports that your blood has been successfully analysed for reactions against 11 extra food types, and has identified a food specific IgG reaction to one of the antigens tested.

If you have any questions or concerns about your food intake, you should speak with the practitioner that arranged the test for you.
