Installation Guide

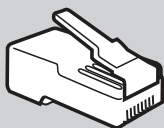

CJ-UNI KIT

Installation Guide

The **CJ-M-UNI (Y-cable)** is used for applications where the microphone and speaker audio are in separate connectors on the mobile radio. Example: A mobile radio with an RJ-45 hand mic connector and a 3.5mm external speaker jack.

The **CS-5P-UNI (straight cable)** can be used in applications where microphone, speaker, and PTT are located in the same connection. Example: a radio that uses a hand mic that has a speaker and microphone.

INCLUDES:

2 x RJ45
CONNECTORS

2 x RJ-11
CONNECTORS

1 x STRAIGHT
CABLE

1 x 'Y'
CABLE
