INSTALLING GROUND STRAPS will greatly reduce electrical noise and improve radio performance

**INTERCOM AND RADIO**

- **BOLT TO FRAME - NOT BATTERY**
- Stack on existing ground wire on back of intercom
- Scrape away paint/powder coating to provide good metal contact.

**NMO ANTENNA MOUNT**

- **BOLT TO FRAME - NOT BATTERY**
- The ideal location for this ring terminal is on an existing ground junction which is generally located on the main chasis of the vehicle.
- Scrape away paint/powder coating on bottom side of mount surface and ring location to provide good metal contact.
