

BLUETOOTH PAIRING

RRP660PLUS, RRP696, WM-1, WM-2, and SS-WM1

Pairing Instructions for Rugged Bluetooth Enabled Devices

Before starting, be sure your Rugged Bluetooth device is powered off and the bluetooth function on your phone or other device is also off.

Turn on the intercom.

Turn on the device's bluetooth and make sure it is "discoverable".

Wait for "RUGGED" to be displayed on the device. This can take up to 30 seconds.

Select "RUGGED" and wait for the device to pair to the intercom.

If pairing is not successful, re-start the process.

NOTES:

- Bluetooth is enabled any time the intercom is powered on. To reset the Bluetooth module / connection, power the intercom off for 1 minute and power back on.
- Rugged Bluetooth devices will automatically reconnect to the last device it was paired to. When pairing to a new device, be sure to disable Bluetooth on previously paired devices before beginning.
