

UHF STEALTH ANTENNA Data Sheet

UHF

P.N. STEALTH-UHF

This UHF antenna is pre-tuned at the factory. It provides excellent performance in a wide variety of conditions and does not require tuning in most applications.

This Non Ground Plane Stealth antenna was designed for applications where a metal ground plane (such as a steel or aluminum) is not available. This design makes it perfect for mounting on a roll bar, fabricated tab, and other similar mounts. It will also work well on non-metallic roofs such as plastic or fiberglass. NOT intended for ground plane applications such as a steel or aluminum roof.

SPECS:

Freq:	450-480 MHz
Gain:	2.1 dBi
Mount Type:	NMO
Max Power:	100 Watts
Length	3.4"
Whip Material	Stainless Steel
Ground Plane	Not Required

The best place for any antenna is always as high as possible with no obstructions
