

SUPPORTS
JOINT HEALTH

HEALTHIER,
HYDRATED SKIN

FULLER HAIR &
STRONGER NAILS

Grass Fed and Pasture Raised

COLLAGEN +PROTEOX

Unlike regular collagen products, which can take between 30 and 90 days to start working, Collagen + Proteox™ starts working in as little as 14 days!

Don't Settle for Half!

Don't Settle for Half

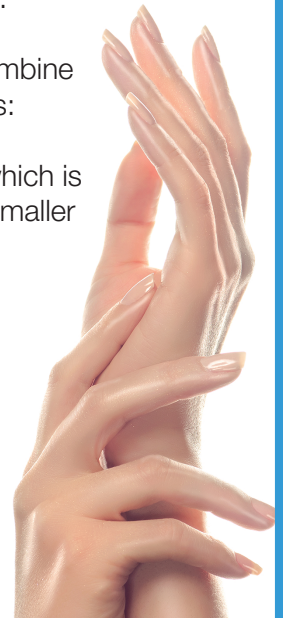

If you're taking a regular, straight collagen supplement, you're only getting half the equation.

Why? Because in your body, collagen works hand in hand with proteins called proteoglycans to plump and hydrate your skin, strengthen your nails, thicken your hair, and cushion your joints.* Without proteoglycans, you're only getting half the benefits you could be getting.

Lewis Labs **Collagen + Proteox™** proteoglycans is the first product ever to combine these two biologically active ingredients into one powerhouse formula. It features:

- 1. Grass-fed, pasture-raised hydrolyzed collagen peptides type I & III** — which is easier to digest and absorb because the amino acid chains are broken into smaller units.
- 2. Proteox™ salmon cartilage proteoglycans** — a groundbreaking, clinically-tested and patented Proteoglycan extracted from Salmon nasal cartilage.

Proteox™ has been clinically tested in a randomized, double-blind, placebo-controlled clinical trials to help improve skin condition, relieve knee pain and discomfort, and improve overall joint health. Are you ready to feel the benefits of the most powerful collagen available? It could do miracles for your joint health and beauty no matter what age you are.

Hydrolyzed Bovine Collagen Peptides

Collagen + Proteox™ contains collagen Types I & III. We only use the finest grass-fed, pasture-raised bovine collagen without using any hormones, chemicals or antibiotics. Our collagen has been specially hydrolyzed into tiny particles, so it's in the most bioavailable form for optimal digestion and absorption.

Proteox™ Salmon Cartilage Proteoglycans

Proteoglycans are proteins found abundantly in connective tissue such as skin, bone, and cartilage, where they form a youthening, hydrating matrix alongside collagen. They have been consumed as a powerful supplement in Japan for many years, where they are known to boost joint and skin health and support the immune system.

Lewis Labs Proteox™ Salmon Cartilage Proteoglycans are made in small batches from a rare source in Japan. Their purity, limited availability and expensive, patented extraction methods are what make **Collagen + Proteox™** such a special product. It is only possible to extract tiny amounts of proteoglycans from Salmon nasal cartilage, but luckily, it's so powerful that a tiny amount can yield big results. **Unlike regular collagen products, which can take between 30 and 90 days to start working, Collagen + Proteox™ starts working as little as 14 days!**

Proteox™ has a wide range of clinically-tested benefits, including improving skin conditions, helping your body regenerate skin cells and attenuate knee discomfort. In a randomized, double-blind, placebo-controlled clinical study, proteoglycans also significantly improved joint issues.

Supplement Facts

Serving Size: 1 Scoop (11.3g)
