AUDIO BURN-IN

Burn-in is the process for exercising new audio equipment. Most headphones require at least 40 hours of burn-in time to reach their optimal performing state. The main purpose of the burn-in process is to loosen the diaphragm of a newly crafted headphone and to stress the headphone driver. Most audiophiles agree that the sound quality will be noticeably improved after burn-in.

Burn-in your audio equipment with the JLab Audio app available on the App Store and Google Play

Or download our burn-in method at: jlabaudio.com/pages/audio-burn-in

INSTRUCTIONS FOR USE

- 1 Lower the volume on your audio device.
- 2 Gently insert the earbuds into your ears.
- 3 Gradually raise the volume to a comfortable level.
- 4 In order to block outside noise, position the earbuds so they form a seal inside your ear.
- 5 Test the various gel tip options to find the best fit.

CLEANING

The FIT is 100% splashproof, sweatproof + washable with an IPX6 rating. Simply rinse off your earbuds after use.

FITTING

- 1 Start from the back + rotate around the ear

- 2 Secure cable in front, back + bottom

DOUBLE CLICK:

- ▶▶ Track Forward

TRIPLE CLICK:

- ◀◀ Track Backward

CAUTIONS

- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing the earbuds, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in the earbud tips, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your earbuds as you would a nice pair of sunglasses and keep them in safe location when not in use.
