INSTRUCTIONS FOR USE

- 1 Lower the volume on your audio device.
- 2 Gently put headphones on your ears.
- 3 Gradually raise the volume to a comfortable level.
- 4 In order to block outside noise, position the headphones so they form a seal inside your ear.

WARM-UP YOUR HEADPHONES

Optional: Burn-in is the process for exercising new audio equipment. We recommend 40 hours of burn-in time for most headphones to reach optimal performance. The main purpose of the process is to loosen the diaphragm of a newly crafted headphone and to stress the headphone driver. Normal, everyday use can also burn-in the headphones though JLab's proprietary burn-in provides an ideal mix of sounds and frequency sweeps to achieve this.

 **Burn-in your audio equipment with the JLab Audio app available on the App Store and Google Play.**
Or access the burn-in method at: jlabaudio.com/burnin

CAUTIONS

- Avoid getting moisture or liquids on the headphone cups.
- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing headphones, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in headphone cups, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your headphones as you would a nice pair of sunglasses and keep them in safe location when not in use.
