FIRST TIME SETUP: BLUETOOTH PAIRING

1 Turn on the Bluetooth in your device settings.

2 When the Intro Wireless Headphones are powered off, press and hold the Power Button for approximately 10 seconds.

Fast blinking red and blue light indicates searching for Bluetooth device.

3 Select "JLab Intro BT" in your device settings to connect.

When the headphones are paired, voice prompts "You are connected" and **blue light will flash slowly.**

Notes:

- Bluetooth is a wireless radio technology, which means it is sensitive to objects between the headphone and the connected device. The headphone is designed to be used within 33 feet (10 meters) of a connected device, with no major objects in between (walls, etc.).
- Once successfully connected, the headphone will memorize your device and automatically pair when turned on in the future. Only one device may be connected at a time. To pair a different device, first unpair the current one through its Bluetooth settings.
- If for any reason Bluetooth connection is lost, manually reconnect your Bluetooth device.

ACCESSORIES

MICRO USB CABLE

CHARGING

Note: For optimum performance, charge overnight with Micro USB cable prior to using. Allow about 3 hours to fully charge.

Connect the Micro USB (included) to the headphone and connect the USB into a computer or AC adaptor (not included). Make sure the USB connection has a power output source.

Solid red light indicates the headphone is charging.

Solid blue light indicates charging is complete.

JLab C3™ signature
sound with amplified
bass and vocals

BALANCED (Two Beeps)

Even sound with
no additional
enhancements

BASS BOOST (Three Beeps)

Amplified bass
and sub-bass

WARM-UP YOUR HEADPHONES

Optional: Burn-in is the process for exercising new audio equipment. We recommend 40 hours of burn-in time for most headphones to reach optimal performance. The main purpose of the process is to loosen the diaphragm of a newly crafted headphone and to stress the headphone driver. Normal everyday use can also burn-in the headphones, though JLab's proprietary burn-in provides an ideal mix of sounds and frequency sweeps to achieve this.

Burn-in your audio equipment with the JLab Audio app available on the App Store and Google Play

Or access the burn-in method at: jlabaudio.com/burnin

CAUTIONS

- Avoid getting moisture or liquids on the headphone cups.
- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing headphones, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in headphone cups, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your headphones as you would a nice pair of sunglasses and keep them in safe location when not in use.
