FIRST TIME SETUP: BLUETOOTH PAIRING

1 Turn on the Bluetooth in your device settings.

Settings
Bluetooth

2 When the Omni Headphones are powered off, press and hold the center button for approximately 10 seconds.

The power will first turn on with a **blinking white light** and voice "JLab Omni on" followed by **blue and white blinking lights** and voice "Waiting for device to connect".

3 Select "JLab Omni" in your device settings to connect.
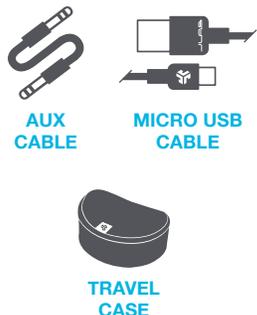

Settings
Bluetooth
JLab Omni

When the headphones are paired, voice prompts "Omni paired to device" and **white light blinks slowly**.

Notes:

• For Bluetooth to work with your device, make sure the AUX switch is on AUX OUT. Omni will search and connect to the last Bluetooth device it was connected to when turned on.

• Omni can be connected to 2 devices at one time but cannot play simultaneously. To reset the Bluetooth connection with a new device, follow the Bluetooth pairing steps. To unpair, select forget JLab Omni on your device in your Bluetooth settings.

• If for any reason Bluetooth connection is lost, manually reconnect your Bluetooth device.

ACCESSORIES
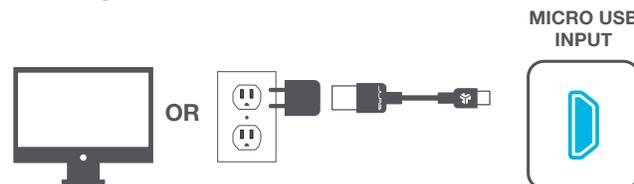

AUX CABLE

MICRO USB CABLE

TRAVEL CASE

CHARGING Note: For optimum performance, charge overnight with Micro USB cable prior to using.

Connect the Micro USB cable to the headphone's left earcup input and connect the USB into a computer or AC adaptor (not included). Make sure the USB connection has a power output source.
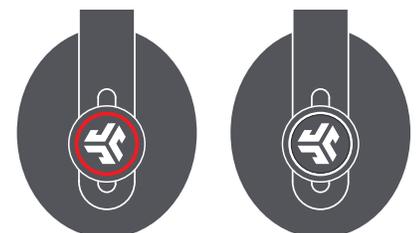

Solid red light indicates Omni is charging.
Solid white light indicates Omni is fully charged.

Full charge is between 1.5-2 hours.

AUX OUT FUNCTIONS

MIC AUX OUT AUX IN

SHARE YOUR MUSIC
Connect another headphone or earbud into
the Omni AUX port to share the same content
from your Bluetooth device. The Omni will
power both devices and the button functions
will work alongside both headphones.

BLUETOOTH RECEIVER
Using the AUX cable, the Omni can plug into a
receiver or stereo input and turn the device into a
Bluetooth receiver. Make sure to adjust the volume
on the Omni and your input device accordingly.

AUX IN FUNCTION

MIC AUX OUT AUX IN

Connect the AUX cable to the Omni AUX port and your device to use as a
non-Bluetooth headphone. Omni does not need to be turned on for AUX
INPUT function.

**Note: The Omni button functions will not function while in AUX INPUT
mode. Functions will be controlled solely from your device.**

WARM-UP YOUR HEADPHONES

Optional: Burn-in is the process for exercising new audio equipment. We recommend 40 hours of burn-in time for most headphones to reach
optimal performance. The main purpose of the process is to loosen the diaphragm of a newly crafted headphone and to stress the headphone
driver. Normal, everyday use can also burn-in the headphones though JLab's proprietary burn-in provides an ideal mix of sounds and
frequency sweeps to achieve this.

**Burn-in your audio equipment with the JLab Audio app available on the App Store and Google Play.
Or access the burn-in method at: jlabaudio.com/burnin**

CAUTIONS

- Avoid getting moisture or liquids on the headphone cups.
- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing headphones, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in headphone cups, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.

- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your headphones as you would a nice pair of sunglasses and keep them in safe location when not in use.
