

Dear Customer

It is with regret that from the 31st March 2018 Sibert Instruments Ltd will cease operations in the solar industry sector under the trading name Sibert Solar. Regretfully the most recent years have been very challenging financially and despite some excellent supplier partnerships, reductions in demand for products, margin erosion, bad debt and continuing poor customer payments have all played a significant part in this decision.

Sibert Instruments Ltd will continue to support the Siebert range of LED displays for both solar and industrial applications and it will continue to support the Myenergi range of EV charging products going forward.

I am happy though to announce that onward going support for Solarlog and associated products will be transferred to Sibert Solar Ltd a new entity which will be maintained by Mr Andy O'Leary formally of Sibert Instruments Ltd / Sibert Solar. Andy will continue to support Solarlog enquiries, Sibert EMS enquiries and ongoing commitments for outstanding installations and support. Andy can be contacted on 07775 427243.

There will be a period of transition after the end of March and we hope to continue to support Andy in certain areas going forward and we wish him every success with this venture.

We would like to thank you for your support over the last years and we wish you continued success in your Solar ventures.

If you have any questions please feel free to contact me at:
david.gardner@sibert.co.uk

David Gardner
Managing Director – Sibert Instruments Ltd
