

FILTRE ÖKO SUGGÉRÉ		LES RECOMMANDATIONS D'ÖKO EUROPE POUR LES PAYS ÉTRANGERS				
L2		La puissance de filtration est suffisante pour boire une eau potable et sans danger. ÖKO EUROPE équipe ces gourdes du filtre L2.				
L2/L3		Un système avec des pores à 0,1 micron (paire filtrante par aspiration) ou le L2, qui filtre des particules plus petites mais les pores sont plus grands, ce qui peut faire peur à certains. Vous avez le choix.				
TAR <small>(TRAITEMENT ADDITIONNEL REQUIS)</small>		Ne répond pas aux normes d'eau potable pour la filtration seule. Une micropure (traitement chimique au chlore) est recommandée. REPASSÉZ l'eau dans votre filtre L2 => plus de chlore et bien plus agréable à boire ATTENTION : votre filtre s'usera plus vite car les taux de concentration standard sont beaucoup plus élevés que la normale (taux de concentration NSF).				
CONDITIONS INTERNATIONALES D'AMÉLIORATION DE L'EAU DANS LES CADRES URBAINS ET RURAUX
