

THE BETTER SOLUTION FOR

Dog Anxiety

POLO SHIRT FITTING INSTRUCTIONS

STEP 1: Perform the “Initial Fitting & Conditioning” as described below.

STEP 2: When an anxiety trigger is likely or already present (e.g. thunderstorm approaching) slip the ThunderShirt onto your dog. Observe the results. Many dogs need no further treatment for many anxiety types. Are you satisfied with the improvement you see? If not, please proceed to Step 3 below.

STEP 3: (Not Required In Many Cases): If your dog’s anxiety still needs additional treatment, we recommend integrating ThunderShirt into a training program. Go to thundershirt.com/blog for more information or call **866.892.2078**.

INITIAL FITTING & CONDITIONING

ThunderShirt is designed to be very easy to put on and take off... no need for pulling anything over her head or threading her legs through leg holes. After you first receive your ThunderShirt, we recommend the following steps while your dog is NOT feeling anxious:

1. Before putting ThunderShirt on your dog for the first time, offer a small food treat to your dog using the folded ThunderShirt as a “plate”. Dogs typically become more comfortable and trusting of something that “brings” them food or anything that they associate with food. So this is an easy little trick to quickly create a positive association with ThunderShirt for your dog.
2. Next, simply follow the “**Fitting Instructions**” on the other side of this sheet. Leave ThunderShirt on for 5-10 minutes. Following these simple instructions allows you to learn exactly how to use ThunderShirt while the dog is calm and helps to avoid the risk that she might begin to associate ThunderShirt with what bothers her. It can also be beneficial to put ThunderShirt on every 4 to 8 weeks in the absence of anxiety.

To further strengthen positive associations with ThunderShirt, provide a treat to your dog each time right after you put it on. Most ThunderShirt dog owners report that their dogs really enjoy wearing their ThunderShirts, and many dogs even go on their own to where their ThunderShirts are stored when a storm approaches or some other anxiety trigger happens!

INFORMATION ON RETURNS OR EXCHANGES:

If you purchased your ThunderShirt directly from ThunderWorks, please visit thundershirt.com/returns. If you purchased your ThunderShirt from another retailer, please contact them directly. ThunderWorks is unable to process returns or exchanges for products purchased from another retailer.

POLO SHIRT FITTING INSTRUCTIONS

READ BEFORE USING YOUR THUNDERSHIRT

USING FOR EXTENDED PERIODS OF TIME: ThunderShirt is designed to be safe to leave on for extended periods of time when appropriate for the situation or issue. When sized correctly and properly put on with a soothingly snug fit, your dog should be very comfortable. If your dog will be wearing a ThunderShirt for more than **one hour** at a time, we recommend removing ThunderShirt every one to two hours during the initial periods to check for any signs of irritation points. Irritation points are very rare, but it is best to be cautious. After confirming no irritation points during initial uses for extended periods, we recommend that you still **remove the ThunderShirt at least twice a day for thirty minutes.**

NO EXPOSED HOOK FASTENERS: When properly sized and put on your dog, no sections of "hook fasteners" (the side of the fasteners that feels rough to the touch) should be exposed on the outside or against your dog's fur. If you see exposed hook fasteners in either place, please remove the ThunderShirt and contact us at service@thundershirt.com or 866.892.2078.

CHEST STRAPS SHOULD BE LOOSE AROUND NECK: Use the "two-finger" collar rule when applying the neck straps (i.e. easily slide two fingers between the neck straps and your dogs neck without pressure). The neck straps are only intended to keep the ThunderShirt in place.

SEE DIAGRAMS TO THE RIGHT TO IDENTIFY PARTS MENTIONED BELOW

- 1 Lay ThunderShirt over the back of your dog with the logo facing up. **Lightly wrap the Chest Straps** around the front of the dog and secure with fasteners.
- 2 Lift the **Short Flap** up and lay over the back of the dog. Pull the **Long Flap** under the torso of the dog and secure onto the **Under Flap** with fasteners.
- 3 Wrap the **Short Flap** down onto the **Long Flap** and secure with fasteners. Adjust for a comfortably snug fit as necessary.
