

Calming Collar

POWERED BY

PHEROMONES FOR A CALMER DOG

What is ThunderEase® Powered by ADAPTIL®?

When new pups are born, their mother naturally emits pheromones that give the puppies a sense of security and comfort. These pheromones help dogs bond to each other and their mom. ThunderEase® replicates these pheromones for a drug-free, vet-recommended calming solution that may help reduce unwanted behaviors like destructive chewing and problem barking. ThunderEase® is powered by ADAPTIL®, the #1 Vet Recommended solution that helps your dog feel calm and relaxed in stressful situations.

Please read before using any ThunderEase products.

THUNDEREASE COLLAR

Analogue of Dog Pheromone5%

Puppy & Small Dog Collar –

46.5 cm (18.3 in). Designed to fit necks up to 37.5 cm (14.7 in).

Medium and Large Dog Collar –

70 cm (27.6 in) Designed to fit necks up to 62.5 cm (24.6 in).

THUNDEREASE® MAY BE EFFECTIVE FOR:

- Fear of loud noises like thunder and fireworks.
- Uneasiness in a new home or environment.
- Stress when socializing or during training.
- House-soiling (or “uh-ohs” as we like to call them).
- Destructive chewing.
- Travel anxiety such as shaking, vomiting, panting, agitation, and salivation.
- Stress when visiting the vet.
- Anxiety when boarding or kenneling.
- Stress caused by changes in the environment like new furniture or remodeling.

Usage Instructions: (refer to images on inner foil packaging) Place your finger inside the plastic loop and pull the thin plastic away to uncoil the collar. This piece can be discarded. Thread the end of the collar through the buckle and place over your dog’s head. Tighten the collar snugly so it fits against your dog’s body, but loose enough to slide one to two fingers underneath. Squeeze the collar onto the buckle area to lock the collar in place. Trim off the excess end of the collar.

ThunderEase Calming Collar is activated by your dog’s body heat, so it must remain in contact with your dog’s skin. The collar should remain on your dog at all times (except when bathed or groomed). Most pet parents begin to see results within 7 days.

The collar will stop diffusing if wet. Once the collar is dry, it will begin working again. Do not expose to chlorinated pools or shampoos, it will deactivate the collar.

Do not attach a leash to the collar. The ThunderEase collar is not designed to hold a leash. Leave your dog’s regular collar on for walks.

One collar lasts up to 30 days. Replace your collar every 4 weeks for maximum calm.

Dog behavior is often complicated and all dogs are unique, so results may vary. ThunderEase® is only detected by dogs and is appropriate for any age, from puppies to older dogs. ThunderEase® is NOT recommended for hyperactivity or aggression. For best results, use for a full 30 days. If additional behavior modification is needed, seek advice from your veterinarian or professional trainer. ThunderEase® may be used in conjunction with medications or other treatments (like ThunderShirt®). ThunderEase® is NOT a veterinary medicinal product. Consult your veterinarian if there are signs of disease.

KEEP OUT OF REACH OF CHILDREN.

The collar is not made of recyclable material. Dispose of contents/container in accordance with local regulations.
