

Calming Spray

PHEROMONES FOR A CALMER DOG

It's hard to be calm
when **DOG BISCUITS!!!**

What is ThunderEase?

When new pups are born, their mother naturally emits pheromones that give the puppies a sense of security and comfort. These pheromones help dogs bond to each other and their mom. ThunderEase replicates these pheromones for a drug-free, vet-recommended, calming solution that puts an end to unwanted behaviors like destructive chewing and problem barking.

Please read before using any ThunderEase products.

THUNDEREASE IS EFFECTIVE IN TREATING:

- Fear of loud noises like thunder and fireworks.
- Uneasiness in a new home or environment.
- Stress when socializing or during training.
- Problem barking.
- Destructive chewing.
- House-soiling (or "uh-ohs" as we like to call them).
- Travel anxiety such as shaking, vomiting, panting, agitation, and salivation.
- Stress when visiting the vet.
- Anxiety when boarding or kenneling.
- Stress caused by changes in the environment like new furniture or remodeling.

THUNDEREASE SPRAY

Analogue of Dog Pheromone 2%
Isopropanol q.s 60 mL

The effect of ThunderEase Spray lasts 4-5 hours. Each 60 mL bottle delivers about 50 applications (+/- 8 Sprays/use).

WARNING: FLAMMABLE. EYE IRRITANT. May cause drowsiness or dizziness. Keep out of reach of children. Keep away from heat, sunlight and ignition sources. Do not smoke during use. Avoid contact with eyes. Avoid breathing vapors. If sprayed in eyes, rinse continuously with water for several minutes. If ingested, do not induce vomiting. Do not spray directly on dogs. Store in a well-ventilated cool place.

Data on file. Backed by science! A variety of scientific, clinical studies published in respected journals or presented at conferences have demonstrated the efficacy of ThunderEase. Dog behavior is often complicated and all dogs are unique, so results may vary. ThunderEase is only detected by dogs and is appropriate for any age, from puppies to older dogs. ThunderEase is NOT recommended for hyperactivity or aggression. For best results, use for a full 30 days. If additional behavior modification is needed, seek advice from your veterinarian or professional trainer. ThunderEase may be used in conjunction with medications or other treatments (like ThunderShirt!).

ThunderEase is NOT a veterinary medicinal product. Consult your veterinarian if there are signs of disease.
