Skimmer Filter MK II

The Ultimate Pond Debris Remover

Pond Skimmer Filter Installation

Make sure the skimmer is level side to side & front to back.
Make sure the filter mat support is in place when packing with soil

Dry fit the two top corner screws

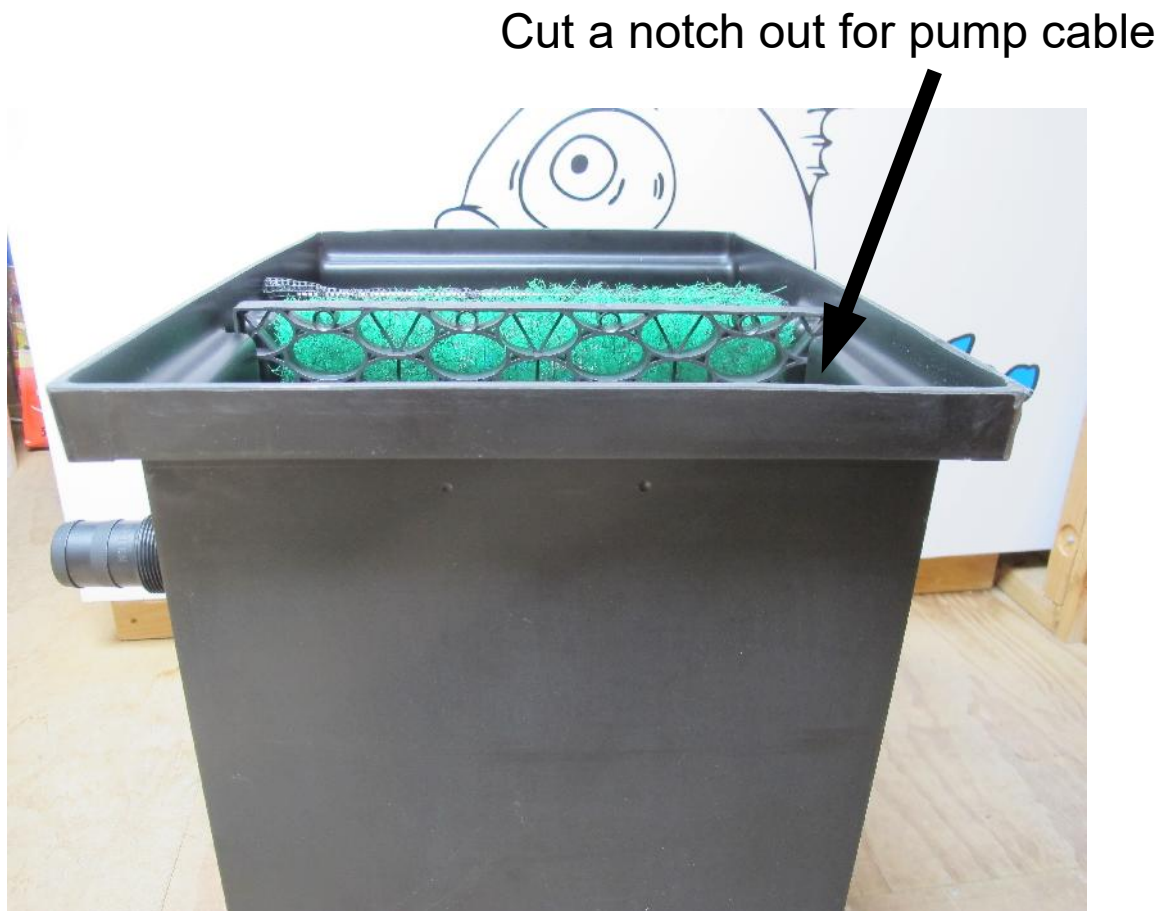

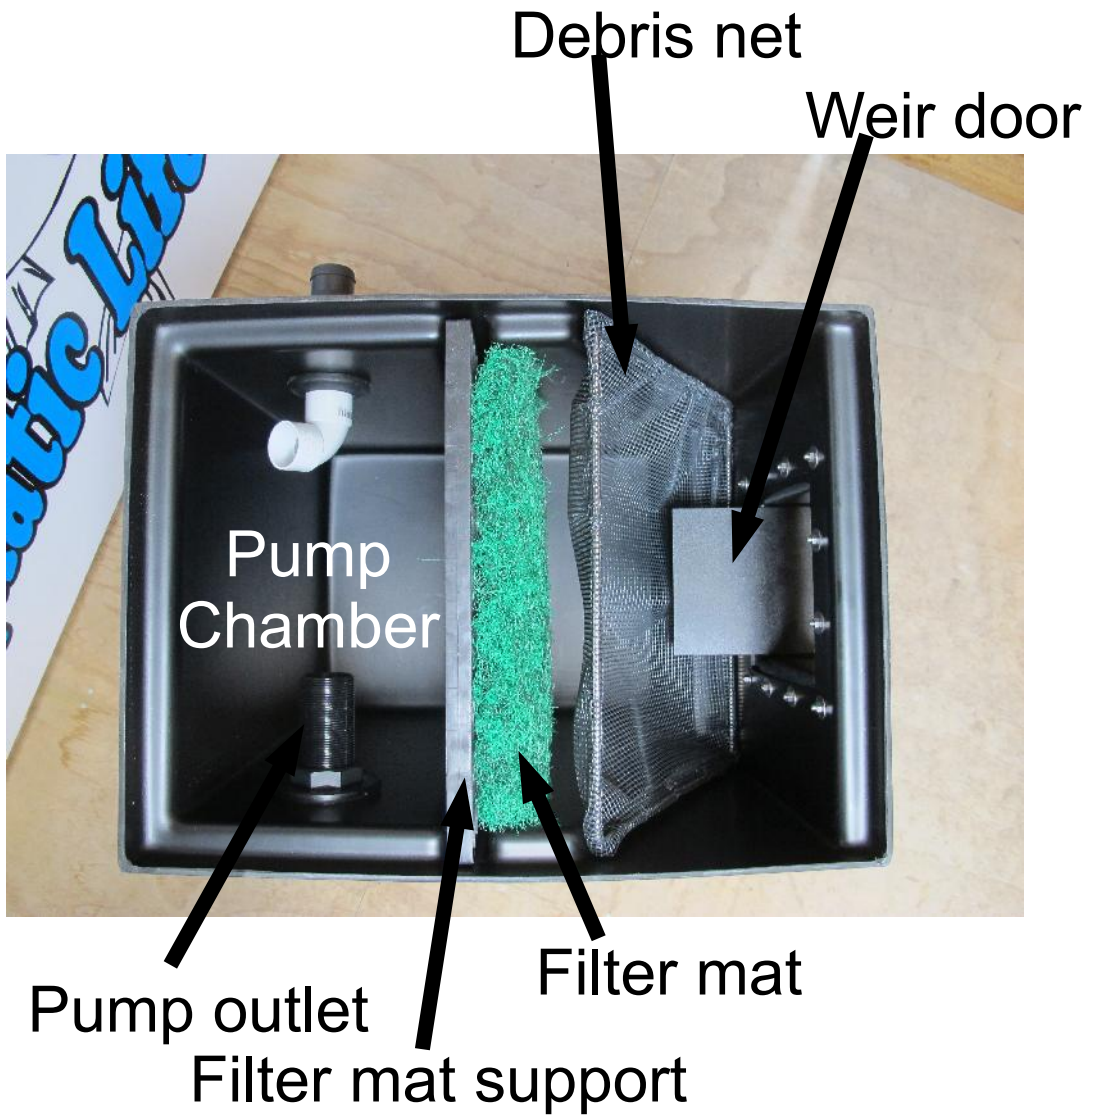

Clean both the back of the liner and the front of the skimmer box.

Put a silicone bead around the screw holes on the skimmer and place the liner and weir door assembly against it.

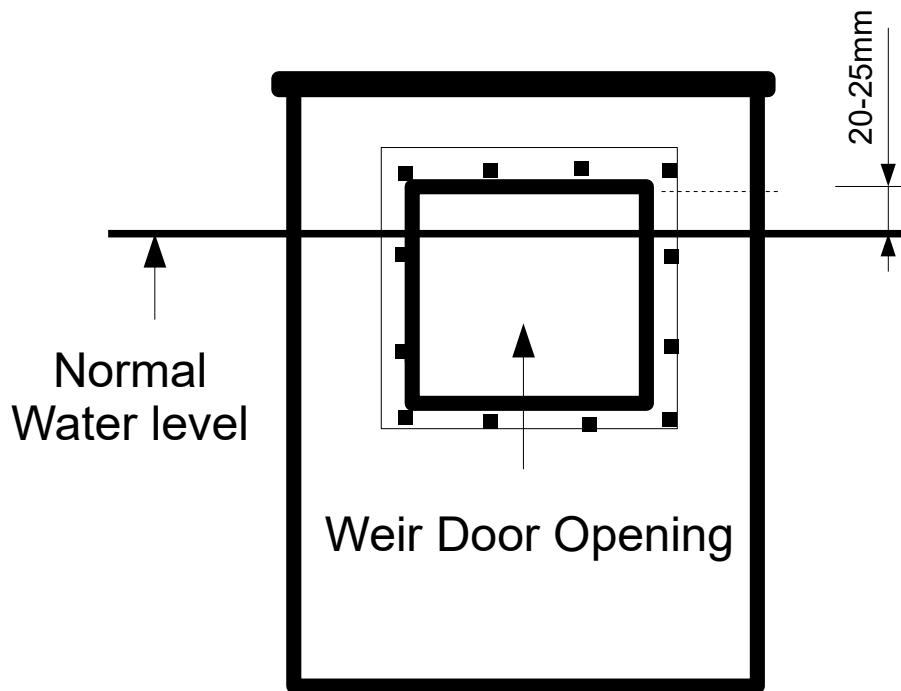

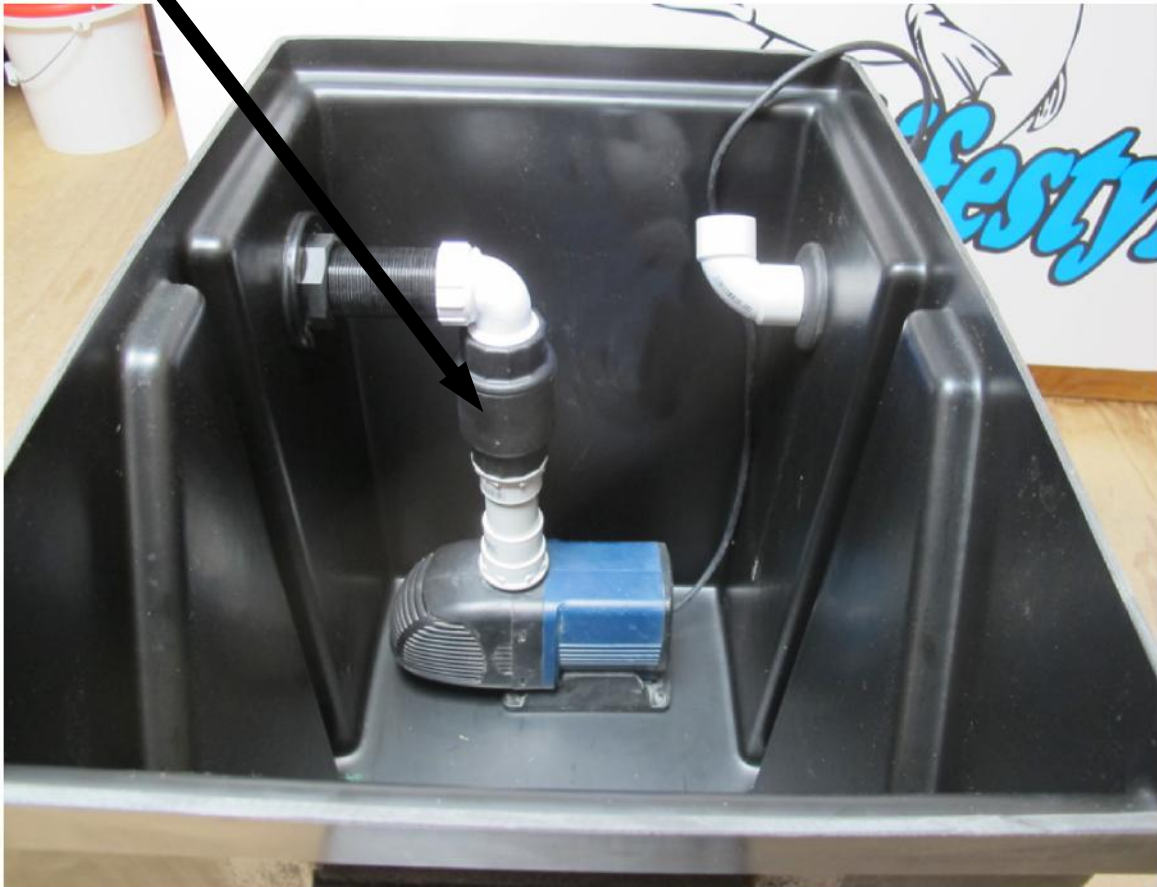

(DO NOT put underlay between them) Fit all the screws and screw up tight. Finally cut the liner out from the back.

Hint: Leave a fold of loose liner below the skimmer to allow for future height adjustment

Check valve

Skimmer Box
Front view

Important: When compacting soil around skimmer box
make sure you have the filter support grill in place
