

Space Maze

Which astronaut lands on the Moon?

The maze is a complex grid of white paths on a light blue background. It features three starting points on the left side, each with a large purple number and an illustration of an astronaut:

- 1**: An astronaut in a white suit riding a small white rocket with red and blue accents.
- 2**: An astronaut in a white suit sitting on a small orange and blue rocket.
- 3**: An astronaut in a white suit riding a larger white rocket with red and blue accents, holding a small flag.

On the right side of the maze, there is a large, detailed illustration of the Moon. The goal is to trace a path from one of the starting points to the Moon.
