

# Create-a-Cup-Creature

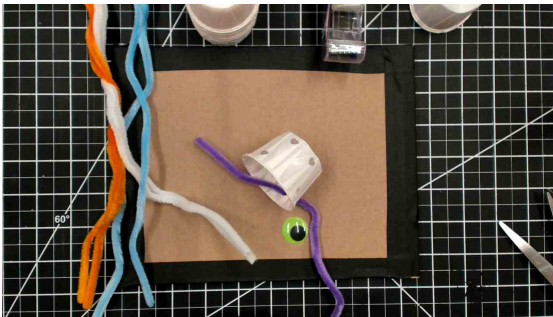

This simple craft project promotes hand-eye coordination, critical thinking in design and of course imagination, using paper cups, pipe cleaners and various decorations!

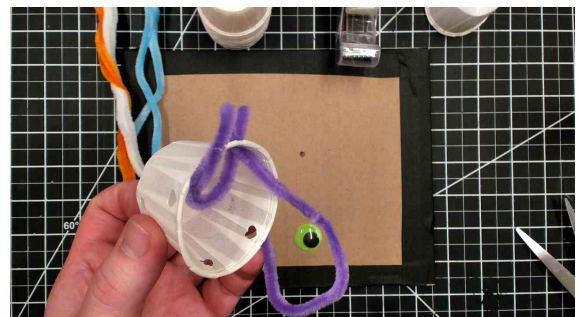

Choose your creature parts.

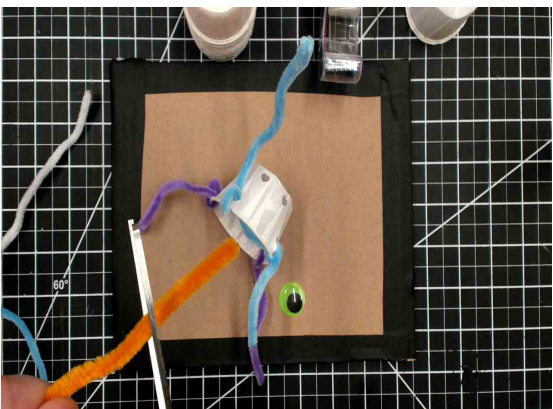

Using a hole punch, make some holes for your creatures arms, legs, tentacles, or horns!

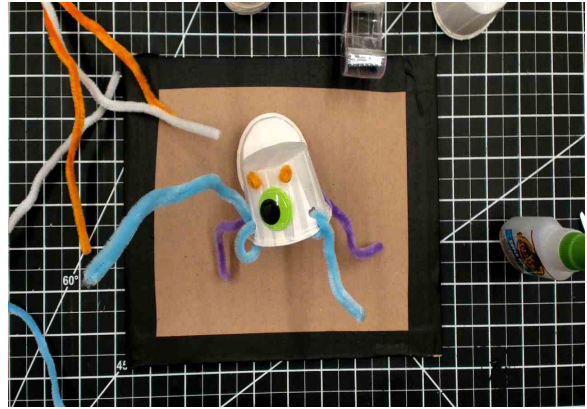

Let's thread a pipe cleaner stick through the first hole.

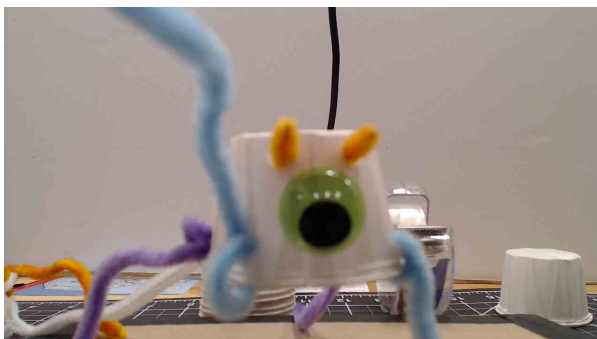

Wrap around once to secure or thread through to the next hole.

Carefully trim or cut pipe cleaners as needed, ask for help!

Personalize and make it your own!

Take your new creature for a walk!

## ***Make: Modifications:***

Use a mini pancake motor and a coin cell battery to make a vibrobot, or add a blinky LED as an eyeball with a simple circuit (positive to positive - negative to negative) to light up your creature. ***What can you Make?***

## **Please Note:**

Small parts present a choking hazards. We recommend ages 5+ for this project, your child's skill levels may vary, we encourage parental supervision and participation!
