

# DASH CAMERA

## Product Description

Meet the FleetFlix AI+ PRO! With its AI-powered LDW (Lane Departure Warning) and FCW (Forward Collision Warning) advanced driving assistance features, the device prevents accidents by identifying potential dangers on the road ahead. Its AI-powered DMS (Driver Monitoring System) further increases driver safety by detecting distracted driving, driver fatigue, and smartphone usage. Its dual 1080p front dash and interior cameras, the FleetFlix AI+ Dash Cam simultaneously captures and processes vibrant HD video footage of the driver and occupants of the vehicle and the prevailing road conditions ahead of it. Footage can be stored locally using a Micro SD card supporting up to 128GB capacity. The FleetFlix AI+ includes live view, IR night vision, a rugged design, OBD2 cabling for power, OTA updates, a panic button, and tamper notification.

## KEY HARDWARE FEATURES
