Teachers Love MATT Workshop

Posters for Bulletin Board

Display your math workshop using the provided bulletin board letter headers, banner pieces, and posters. There are multiple options included so you can choose what works best for your classroom! Display the rotation cards and choice cards underneath to create a distinguished "Math Workshop" area and rotation board for students.

Multiple Rotation Options

There are many ways to use these materials to set up and organize a rotation board. You can pick and choose from what's included and design a board that will work with your number of groups and what you wish to accomplish during your math block. This rotation board will help students work independently and know what's expected.

ROTATION OPTIONS INCLUDES:

- M.A.T.H. acronym
- Number choices
- Rotation 1,2,3, and 4.
- Round 1,2,3, and 4.
- Monday, Tuesday,
 Wednesday, Thursday,
 Friday

Multiple Rotation Options

ROTATION OPTION I

Students are grouped by color and complete 4 rotations in the M.A.T.H acronym.

Multiple Rotation Options

ROTATION OPTION 2

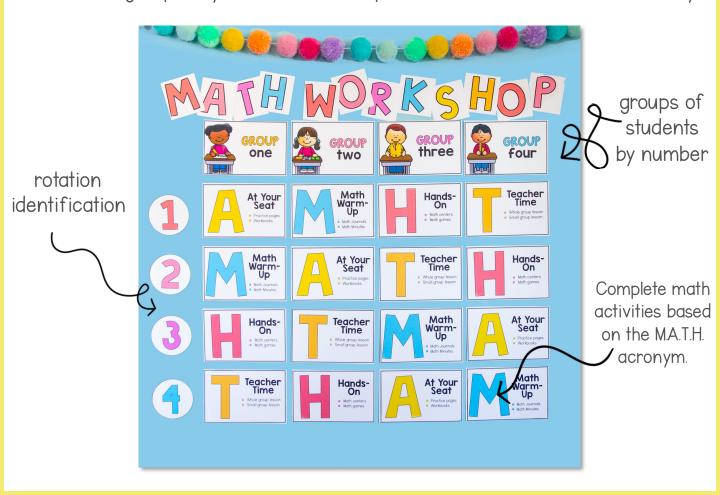

Students complete math activities according to ones that you choose.

Multiple Rotation Options

ROTATION OPTION 3

Students are grouped by number and complete 4 rotations in the M.A.T.H acronym.

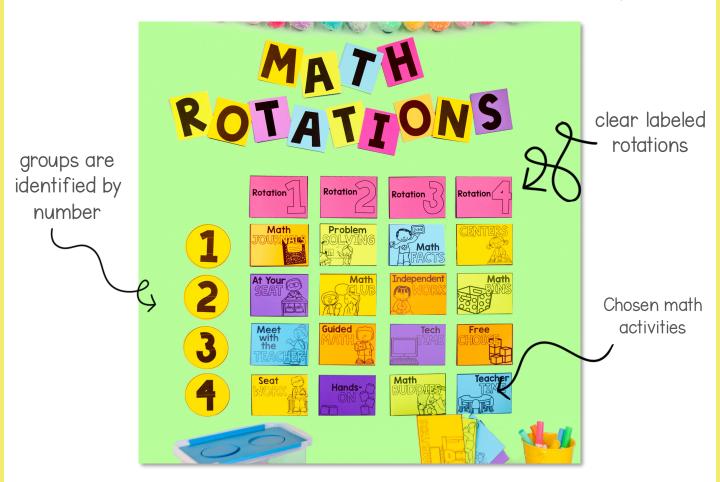

Workshop

Multiple Rotation Options

ROTATION OPTION 4

Students are grouped and complete 4 rotations based on the activities you choose.

Grouping Options

Two group options are included for you to choose from to identify groups of students. Once you have created your math groups, add the names of students to the group cards or identify your students using the colored groups. Hang your cards on your rotation board so students know what to do.

ROTATION OPTIONS INCLUDES:

- Group cards for up to 8 groups (in different variations)
- Colored groups

MATTI Workshop

Activity Cards

There are 20 activity card options included for you to choose from for your rotations. Pick and choose what works best, or edit the centers to fit the needs of your students. Each activity is included alone on a card or with a set of step-by-step instructions.

CENTER OPTIONS INCLUDES:

- math warm up seat work
- at your seat centers
- tech time independent
- hands-on work
- teacher time free choice
- meet with guided math
 - math journals
 - math bins
 - math buddies
 - problem solving
 - ipads

Number Labels

Label items in your classroom for your math groups using the included labels. Labeling things such as drawers, folders, or areas allows students to know which materials they can use during certain parts of your math workshop.

Planning Sheets

Planning your math block, groups and rotation using the included editable planning sheets. Alternatively, you can use it also to track student data. Different options are provided, as well as an editable PDF so you can type your plans, important information, and data as you work with your students with ease!
