Installation steps ①-②

① Put the product buckle down into the TS35 rail.

② Push the product perpendicular to the TS35 rail until hear the sound of the clip snapping into the rail.

Disassembly steps ③-④

③ After inserting a Slotted screwdriver into the square groove at the bottom of the buckle, push the sliding part of the buckle downward according to the direction shown.

④ Push the bottom of the product outwards and take it out upwards.

Connecting/Disconnecting Steps ⑤-⑥

⑤ Loosen the terminal screw with a Phillips screwdriver, insert the wire head under the terminal, and then tighten the terminal screw.

Tightening torque:
Max0.4N · m(Reference);

⑥ Loosen the terminal screw with a Phillips screwdriver and pull the wire out of the terminal hole.

Note: Keep the following installation clearances: 20mm on the top, 20mm on the bottom, 5mm on the left and right sides are recommended when the device is loaded permanently with more than 50% of the rated power. Increase this clearance to 15mm in case the adjacent device is a heat source (e.g. another power supply).
