Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

Caution

1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.

1. Application

This document defines the specification of TCG085WVLQDPNN-GN00. (RoHS Compliant)

2. Construction and outline

LCD	[:] Transmissive color dot matrix type TFT
Backlight system	: LED
Polarizer	: Glare treatment
Additional circuit	: Timing controller, Power supply (3.3V input)
	(without constant current circuit for LED Backlight)

3. Mechanical specifications

Item	Specification	Unit
Outline dimensions 1)	210(W)×134(H)×8.7(D)	mm
Active area	184.8(W)×110.88(H) (21.6 cm/8.5 inch(Diagonal))	mm
Dot format	800×(B,G,R)(W)×480(H)	dot
Dot pitch	0.077(W)×0.231(H)	mm
Base color 2)	Normally Black	-
Mass	310	g

1) Projection not included. Please refer to outline for details.

2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

4. Absolute maximum ratings

4-1. Electrical absolute maximum ratings

Item		Symbol	Min.	Max.	Unit
Supply voltage		V_{DD}	-0.3	4.5	V
Input signal voltage	1)	$V_{\rm IN}$	-0.3	4.5	V
LED forward current	2) 3)	IF	-	100	mA

- 1) Input signal : CK, R0 ~ R5, G0 ~ G5, B0 ~ B5, HSYNC, VSYNC, ENAB, CM, SC
- 2) For each "AN-CA"
- 3) Do not apply reversed voltage.

4-2. Environmental absolute maximum ratings

Item		Symbol	Min.	Max.	Unit
Operating temperature	1)	TOP	-20	70	°C
Storage temperature	2)	Тѕто	-30	80	°C
Operating humidity	3)	Hop	10	4)	%RH
Storage humidity	3)	$\mathrm{H}_{\mathrm{STO}}$	10	4)	%RH
Vibration		-	5)	5)	-
Shock		-	6)	6)	-

- 1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Temp. = -30°C < 48h , Temp. = 80°C < 168h

Store LCD at normal temperature/humidity. Keep them free from vibration and shock. An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard. (Please refer to "Precautions for Use" for details.)

- 3) Non-condensing
- 4) Temp. 40°C, 85%RH Max.

Temp. > 40°C, Absolute humidity shall be less than 85%RH at 40°C.

5)

Frequency	$10\sim55~{\rm Hz}$	Acceleration value
Vibration width	0.15mm	$(0.3 \sim 9 \text{ m/s}^2)$
Interval	10-55-10	Hz 1 minutes

2 hours in each direction X, Y, Z (6 hours total) EIAJ ED-2531

 6) Acceleration: 490 m/s², Pulse width: 11 ms 3 times in each direction: ±X, ±Y, ±Z EIAJ ED-2531

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAB20-00	TCG085WVLQDPNN-GN00	3

	Back porch	Thb	7	88	-	Тс	
Horizontal display	period	Thd		800		Тс	
	Period	—	516	525	534	Th	
	Period	Tv	14.7	16.6	17.4	ms	
Vertical sync. signal	Pulse width	Tvp	1	2	-	Th	
	Front porch	Tvf	-	11	-	Th	
	Back porch	Tvb	4	32	-	Th	
Vertical display per	riod	Tvd		480		Th	

1) In case of lower frequency, the deterioration of the display quality, flicker etc., may occur.

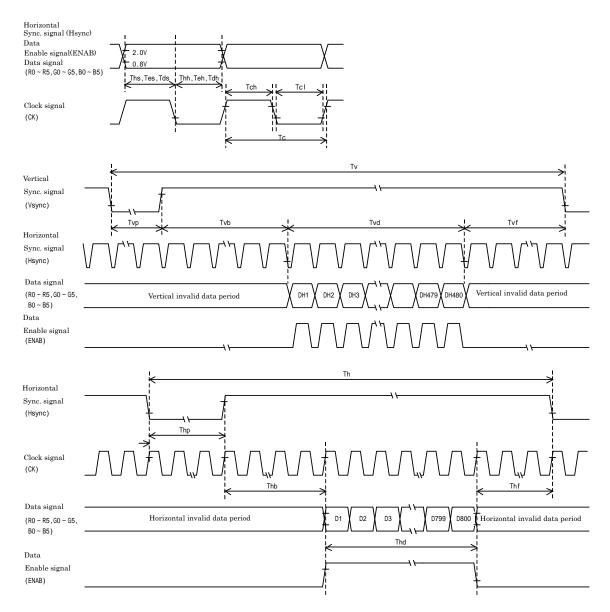

2) If CK is fixed to "H" or "L" level for certain period while ENAB is supplied, the panel may be damaged.

3) When dimming LED by PWM, please adjust LCD operating signal timing and LED driving frequency, to optimize the display quality. There is a possibility that flicker is observed by the interference of LCD operating signal timing and LED driving condition (especially driving frequency), even if the condition satisfies above timing specification.

- 4) Do not make Tv, Th, and Thp fluctuate.
- 5) CK count of each Horizontal Scanning Time should be always the same. Vertical invalid data period should be "n" X "Horizontal Scanning Time" . (n: integer) Frame period should be always the same.

8-1-2. Input timing characteristics

$8\mathchar`-2$. CM \div GND (Uunecessity of V \cdot $H_{\rm SYNC}$)

8-2-1. Timing characteristics

3) When dimming LED by PWM, please adjust LCD operating signal timing and LED driving frequency, to optimize the display quality. There is a possibility that flicker is observed by the interference of LCD operating signal timing and LED driving condition (especially driving frequency), even if the condition satisfies above timing specification.

4) Do not make Tv, Th, and Thp fluctuate.

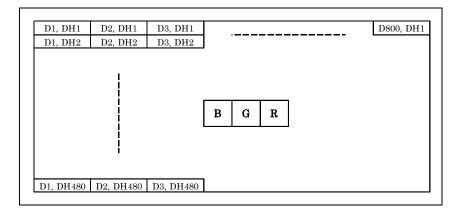

5) CK count of each Horizontal Scanning Time should be always the same.

Vertical invalid data period should be "n" X "Horizontal Scanning Time" . (n: integer) Frame period should be always the same.

8-3. Input Data Signals and Display position on the screen

Spec No.Part No.PageTQ3C-8EAF0-E1YAB20-00TCG085WVLQDPNN-GN0012

9. Backlight characteristics

Item		Symbol	Min.	Тур.	Max.	Unit	Note
Forward current	1)	IF	-	60	-	mA	Ta=-20 ~ 70°C
			-	29.2	32.0	V	IF=60mA, Ta=-20
Forward voltage	1)	VF	-	27.7	30.6	V	IF=60mA, Ta=25
			-	26.8	29.7	V	IF=60mA, Ta=70
Operating life time	2), 3)	Т	-	70,000	-	h	IF=60mA, Ta=25

1) For each "AN-CA"

When brightness decrease 50% of minimum brightness.
 The average life of a LED will decrease when the LCD is operating at higher temperatures.

- 3) Life time is estimated data. (Condition : IF=60mA, Ta=25 in chamber).
- An input current below 15mA may reduce the brightness uniformity of the LED backlight. This is because the amount of light from each LED chip is different. Therefore, please evaluate carefully before finalizing the input current.

10. Lot number identification

The lot number shall be indicated on the back of the backlight case of each LCD.

- No1. No5. above indicate
 - 1. Year code
 - 2. Month code
 - 3. Date
 - 4. Version Number
 - 5. Country of origin (Japan or China)

Year	2012	2013	2014	2015	2016	2017
Code	2	3	4	5	6	7

Month	Jan.	Feb.	Mar.	Apr.	May	Jun.
Code	1	2	3	4	5	6

Month	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.
Code	7	8	9	Х	Y	Z

11. Warranty

11-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

11-2. Production warranty

Kyocera warrants its LCD's for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCD's that are shown to be Kyocera's responsibility.

12. Precautions for use

12-1. Installation of the LCD

- 1) A transparent protection plate shall be added to protect the LCD and its polarizer.
- 2) The LCD shall be installed so that there is no pressure on the LSI chips.
- 3) Since this product is wide viewing product, occurrence level of in-plane unevenness by the external stress is different compared to current normal viewing product. So there is a possibility that in-plane unevenness will be occurred by over twist, strain giving by attaching to LCD, and over pressure to touch panel. Please be careful of stress when designing the housing.
- 4) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

12-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity isrequired.
- 2) Workers should use body grounding. Operator should wear ground straps.

12-3. LCD operation

- 1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.
- 2) Please select the best display pattern based on your evaluation because flicker, lines or nonuniformity or unevenness can be visible depending on display patterns.

12-4. Storage

- 1) The LCD shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

12-5. Usage

- 1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not disassemble LCD because it will result in damage.
- 7) This Kyocera LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 8) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 9) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

13. Reliability test data

Test item	Test condition	Test time	Jud	gement
High temp. atmosphere	80°C	240h	Display function Display quality Current consumption	: No defect : No defect : No defect
Low temp. atmosphere	-30°C	240h	Display function Display quality Current consumption	: No defect : No defect : No defect
High temp. humidity atmosphere	40°C 90% RH	240h	Display function Display quality Current consumption	: No defect : No defect : No defect
Temp. cycle	-30°C 0.5h R.T. 0.5h 80°C 0.5h	10cycles	Display function Display quality Current consumption	: No defect : No defect : No defect
High temp. operation	70°C	500h	Display function Display quality Current consumption	: No defect : No defect : No defect

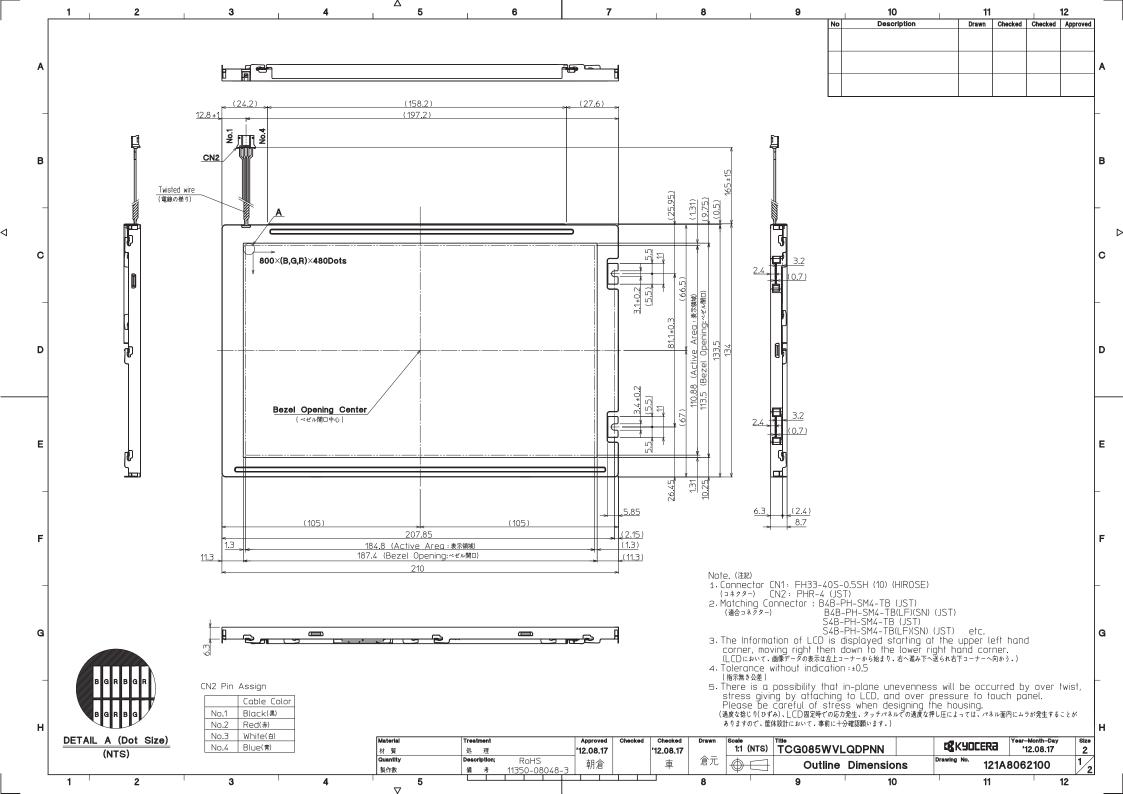

1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.

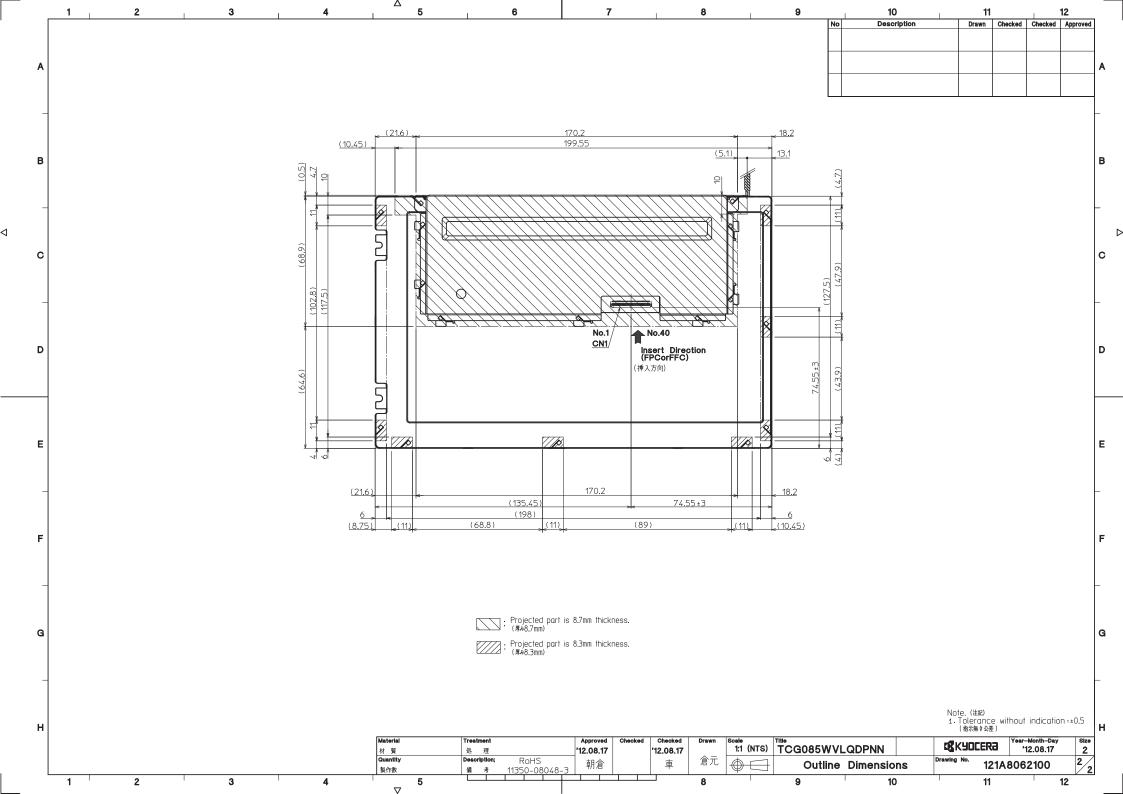

2) The LCD is tested in circumstances in which there is no condensation.

3) The reliability test is not an out-going inspection.

 The result of the reliability test is for your reference purpose only. The reliability test is conducted only to examine the LCD's capability.
