

INSTRUCTIONS TO INSTALL A SOLAR ATTIC FAN VENTILATOR

Tools and Materials Required:

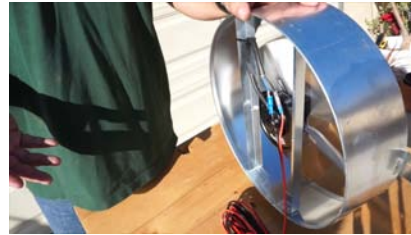

- Ladder
- Drill
- 1/4" Drill Bit

To install a solar attic fan please follow the following steps:

STEP #1:
Remove the solar fan and all parts out of the box. Inspect all parts and make sure you have received all of them.

Parts List:
• Solar Fan • 15 feet of wire
• 4 "Z" brackets • Solar Panel

STEP #2:
Test the unit in the bright sun to make sure it's working properly before installing it on the roof.

IMPORTANT:
There is no on-off switch so as soon as the wires are connected the fan will come On when the solar panel would get the sunlight.

STEP #3:
Install Solar Attic Fan to Exhaust the hot air out of the attic.

NOTE:
Don't forget to connect wires to the solar fan.

STEP #4:
Make a small hole in the roof and pull the wire from the fan to the roof.

IMPORTANT:
Locate a place on your roof where you get maximum sun light.
NOTE: Is recommended to use Roof Tar when making the hole to prevent any water liking.

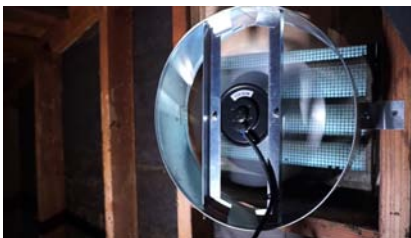

STEP #5:
Install "Z" brackets to the solar panel and connect the wires to the wires on the roof coming from the solar fan.

IMPORTANT:
There is no on-off switch so as soon as the wires are connected the fan will come On when the solar panel would get the sunlight.

STEP #6:
Install the solar panel on the roof.

NOTE: Is recommended to use Roof Tar when making the holes to prevent any water liking.

STEP #7:
Verify attic solar fan is working properly.

IMPORTANT NOTE:

To troubleshoot if the fan is working or not simple connect the FAN ONLY to the car battery and see if the fan works.
