

# Get 10 Yards More Distance

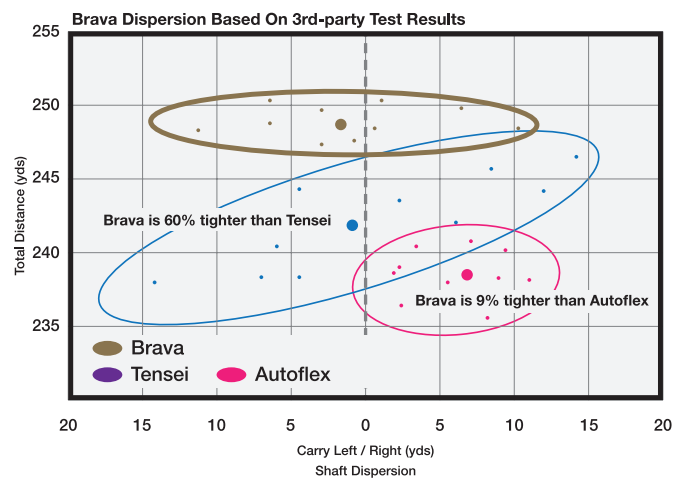

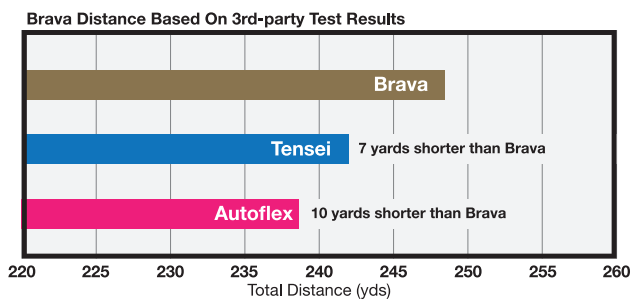

**BRAVA**

BGT has forever changed the way golfers look at putting when the Stability Shafts were introduced. They revolutionized putting by returning the club face to square at impact for consistently straighter putts.

That same thinking went into developing the new Brava™ Driver Shaft. It delivers the power and consistency to perform shot after shot regardless of swing speed or driver model. Designed for maximum ball speed and smash factor because it delivers more center strikes and a better face angle.

In head-to-head testing, Brava™ was up to 10 yards longer than two of the top performing premium driver shafts on the market. The magic comes from a shaft that feels very light yet still delivers incredible power.

Exclusive Speedflite NRG™ technology is built with premium Toray™ carbon fiber, which is 10x the strength of steel at a fraction of its weight. This translates to less energy needed when swinging and results in an exceptionally stable driver head for more distance and tighter ball dispersion.

Flex	Head Speed	Weight	Length	Tip Diameter	Torque	Launch	Spin
A	75 MPH	46 gm	46 in	0.335	6.2°	High	High
R	85 MPH	50 gm	46 in	0.335	5.9°	Mid-High	Mid
S	95 MPH	54 gm	46 in	0.335	5.8°	High	Mid
