

What's Your Putter Say About You?

Let's Make a Putter No One Else Has.

Introducing golf's first ever customizable putter shaft. With the new Stability Carbon you can customize to fit your game—length, connector color, even tip finish. Discover why golfers of all abilities have switched to the exclusive technology of Stability.

- Advanced Materials Integration™ patented technology that delivers the face square at impact and is available only from BGT.
- Carbon weave for playability refinement and improved feel.
- Change your loft, lie, length, balance, grip... even the site lines.
- Customize your shaft with 4 connector options and 2 tip finishes.

- Fits all putters, regardless of brand or bend profile- straight, single or double bends and it's easy to install.
- 1 degree of torque, so your putter face remains square at impact to deliver consistent, accurate putts that roll straight every time.
- 99% of golfers who play Stability prefer it over steel.
