

Introducing ZNE™ ... Golf's First 2-piece Premium Wedge Shaft.

The new ZNE™ 2-piece Wedge Shafts are designed with Advanced Materials Integration™, which delivers the face square at impact for more center strikes and lower scores.

Versatility & Shot Performance

3 weights- 90 gm, 115 gm or 130 gm for optimal feel, control and consistency.

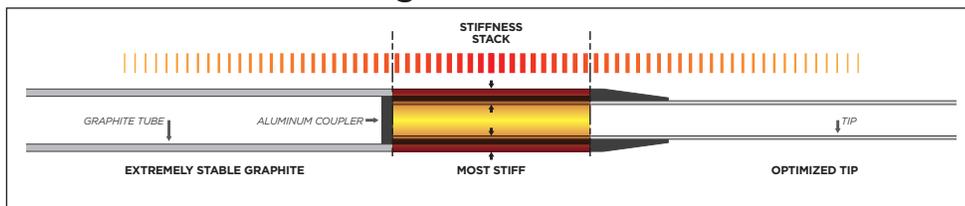

Black Ceramic Dura-Coated Tips

Provides durability and no line of sight distraction. Engineered for optimal launch and spin.

Proprietary Coupler

Designed with internal micro-barbs to ensure a virtually unbreakable bond between graphite and steel.

Ultra-Rigid Stiffness Stack™

This Stiffness Stack™ is 2.5x stiffer than a traditional wedge shaft and allows the kickpoint to be optimized for the perfect launch and trajectory.

Testing shows the patented design of the ZNE™ Wedge Shaft redirects energy so efficiently over steel that;

- 92% of golfers showed better distance control
- Over 90% had tighter dispersion
- 100% of golfers tested said it felt better than steel
- Tested to withstand all types of turf conditions, players and swing speeds

| Weight | Flex | Torque | Frequency | Tip | Butt Diameter | Tip Diameter |
|--------|-------|--------|-----------|--------|---------------|--------------|
| 90 gm | Wedge | 2.3° | 430 CPM | Carbon | 0.600 Inches | .355 Taper |
| 115 gm | Wedge | 1.6° | 500 CPM | Steel | 0.610 Inches | |
| 130 gm | Wedge | 1.5° | 530 CPM | Steel | 0.615 Inches | |

DO NOT TIP CUT! BUTT CUT ONLY!
