BETTER BUILDING THROUGH INNOVATION

CONSTRUCTION PRODUCTS

ABOUT US

Construction Products is operated by Construction Plastics Limited.

Construction Products is proudly New Zealand owned and operated by trade professionals; for trade professionals. With decades of experience in retail, manufacture and construction, we find the best products globally and deliver them to you at the best price we can. No confusing margin schemes or loyalty programs - just the best product we can source or produce, at the best price for all customers, big or small.

We offer an extensive range of payment and site delivery options, so rather than wasting precious time by sending your staff offsite to pick up supplies, keep the team on the tools and have us deliver it to you. You no longer need to jump in the ute, or even leave the job.

Construction Products has a team of in house product designers continuously working on a range of innovative new products for the building and construction sectors.

R-PACKERS

R Packers are the premium joinery, cladding and general construction packer. Made in New Zealand from high-quality polypropylene. The smart alternative to H Packers. Find out why kiwi builders are switching over to these today!

Features:

Can be split into two separate "U" packers.

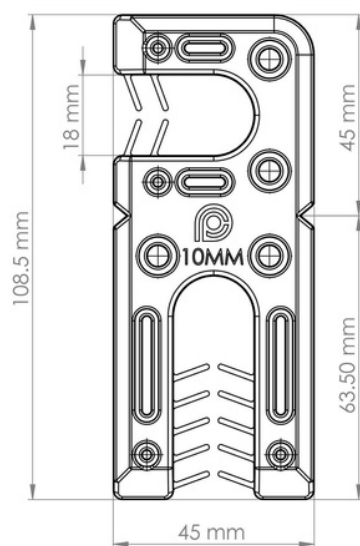

Made from high quality PP plastic. They won't split or shatter like other shims on the market.

Counter-bored holes and slots for easy and flush mounting with nails and screws.

Colour coded for ease of use.

High compressive strength.

Complies with NZ Building Code.

Available in Refill Pack, 150 piece Bulk Pack, or 1000 piece Commercial Pack (by weight). Also available are our Quick Brick Assortment, Master Pack, and Pro Pack.

Sizes: 1.5mm, 2mm, 3mm, 5mm, 6mm & 10mm

HIANDRI BOTTOM PLATE PACKER

84mm x 60mm x 12mm
Bag of 50pcs or 450pcs

Hiandri (High and Dry) blue bottom plate packers are 84mm x 60mm x 12mm, manufactured using polypropylene plastic and each has a compressive strength of 70kN.

These can be used on timber and concrete floors.

- Reduce building delays at 'pre-line' stage due to moisture in the frame.
- By lifting the bottom plates up 12mm off the floor, it allows water landing on the slab or floor to freely move off the floor and not reach depths up to 45mm when trapped by the bottom plates during heavy rain.
- No Damp Proof Course required.
- Compression tested to handle up to 4 tonne.

BAR CHAIRS

SKU: CP-G25/40-A

GROUND CHAIR, 25MM/40MM
Bag of 100 pieces

SKU: CP-G50/65-A

Looking for a certain size poly bag or tubing? Get in touch and we can see what we can do for you.

We also offer the option of custom printing on these products.

Send us your requirements and we will happily organise a quote.

TILE LEVELING SYSTEM

LEVEL YOUR TILES PERFECTLY

This system will aid in laying tiles level and fast. Insert the straps between the tiles as you lay them, then slide the wedge into place through the cutout in the strap to hold the tile surfaces level.

Once the adhesive has set and the tiles are firmly in place, the wedges are removed, then the vertical section of the strap is snapped off. The remainder of the strap stays under the tile edge permanently and is hidden by the grout.

SPACER STRAPS

1mm 100pcs (CP-MB-TLS-02-B-1-1)
1.5mm 100pcs (CP-MB-TLS-02-B-1.5-1)
2mm 100pcs (CP-MB-TLS-02-B-2-1)
Also comes in cartons of 500pcs or 1000pcs

WEDGES

Bag of 100pcs (CP-MB-TLS-02-A)

SCAFFSHIELD®

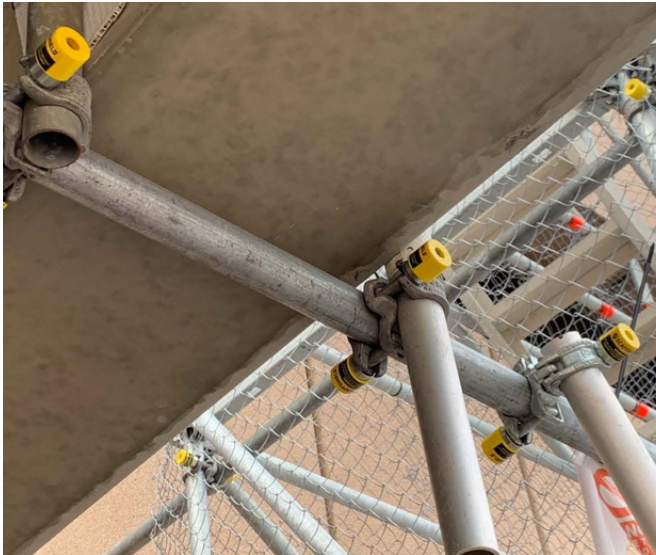

THE SCAFFOLD SAFETY SOLUTION

Construction Products is the exclusive New Zealand distributor of the Scaffshield system

What is Scaffshield?

ScaffShield is a revolutionary anti-tamper locking assembly which reduces the risk of scaffold ties and couplers from being detached from fixed scaffolding, thereby reducing scaffold collapse or failure leading to injury and disruptions.

ScaffShield is the only engineered control product on the market that allows you to prevent scaffold nuts from being removed or loosened by unauthorised personnel, increasing safety on your site.

ScaffShield allows builders and scaffolders to control and protect their scaffold from unauthorised adjustment or removal of components. Having the ScaffShield installed enables a scaffold erection and stripping process to be documented and controlled by the principal contractor and scaffolder.

The Scaffshield locking nut is a patented, anti-tamper device installed over the coupler nut, specifically designed to control the adjustment of ties & components.

The ScaffShield device has a free spinning external sleeve to prevent any standard shifting tool from loosening the coupler nut. A custom manufactured key – the Scaffkey is used to install and remove the ScaffShield over the coupler nut. Scaffkey's are numbered and managed via a tightly controlled register. Once the Scaffshield has been installed using the Scaffkey, the plastic protective cap is fitted.

EASY TO INSTALL

STEP 1:

Screw Scaffshield over existing coupler nut using Scaffkey

STEP 2:

Test sleeve to ensure that it is free-spinning and functioning correctly.

STEP 3:

Install the yellow safety cap.

AND GUARDRAIL UNIT**

SKU: CP-TSMMS-BGE-A

**TITAN MINI MOBILE SCAFFOLD,
BASE, GUARD AND EXTENSION UNIT**

The Titan mini mobile comes in three small boxes for easy storage and transport to site. There are extra accessories for these if required. It is designed and engineered to the AS/AZ1576.1:2010 scaffolding standards, and all are under 5.0m in height so can be assembled, disassembled and used by any competent person. No scaffolding ticket required!

For more information on Titan Scaffolding, please get in touch.

- Easy to install and lightweight.
- High compressive strength.
- Progressive height adjustment.
- Top slope correction (with optional extra adjustment pad).
- Locking rings ensure rigid assembly.
- Large base area mitigates possible membrane damage.
- UV resistant, eco friendly plastic.
- Easily removed, reused or adjusted.
- 10 Year Guarantee

Moonbay adjustable plastic pedestals are made from high quality polypropylene and are UV resistant. They are suitable for use on outdoor terrace areas and can support almost any type of flooring, including timber decking, plastic and composite decking, and stone and ceramic tiles. Pedestals can be laid over any stable substrate.

These clips are made for vertical side tile or timber closure.

Silca[®]

SYSTEM

The Silca System Grate is a 400x450x38mm, 100% Recycled, engineered polycarbonate grate which is screw fixed directly to the joists of a standard timber deck construction, or to floating joist system for over membrane or slab.

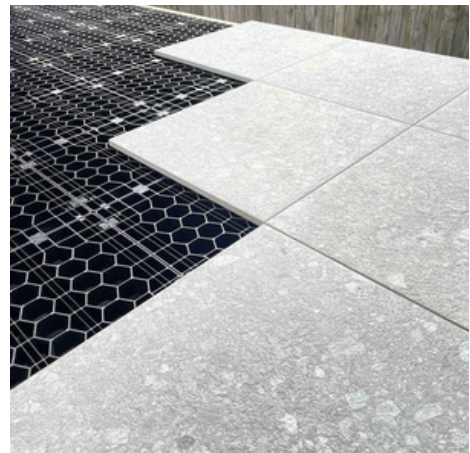

It provides a flat, braced surface on which to lay almost any kind of paving material, whether it be concrete pavers, porcelain, travertine, tiles, brick, natural stone or the many other options available in the market today.

SKU: CP-SSG-A

Silca Grates feature:

- Strengthening ribs and hex cells to spread and transfer load across the decking element and down onto the joist.
- Pre-formed countersunk holes designed to guide the screws into the joist at the correct position. (remember to not overtighten screws as this can damage the countersink).
- A second row of fixing so grates can be uniformly trimmed to slot in between joists should more height clearance be required. (This requires extra timbers clashed to the side of the joist for the grate to sit on.)
- Free draining design for minimum moisture retention.
- Micro flex to absorb any movement within the decking element and reduce risk of any tile or grout disturbance.
- UV stable.
- Manufactured in NZ from 100% recycled materials. Green Building Product.

YOU'RE IN SAFE HANDS

Construction Products is proud to be a partner with Lynn River, who is a 100% New Zealand owned and operated company.

They have grown to become a leading supplier of hand and personal protection products in Australia and New Zealand.

Lynn River searches the world to find quality gloves that solve customers' particular hand protection problems. Offering gloves originating in Europe, America and Asia, often made exclusively to their unique designs and specifications. Their longstanding relationships with the world's leading glove makers mean we can source or tailor even the most specialist gloves.

Lynn River prides themselves on ensuring that all of our products are tested to meet the correct Australia and New Zealand standards. Beyond that, they constantly review customer needs within the PPE market and look for new ways to improve safety outcomes, usability, comfort and overall satisfaction.

Construction Products supply an extensive range of Lynn River products that include top brands like Showa, and products ranging from gloves, eyewear, earmuffs and more.

If there is a Lynn River product that is currently not advertised with Construction Products, please get in touch and we will source it!

SPOT MARKING PAINT

ProSolve™ Fluorescent Marking Paint is a high-quality fast drying and hard-wearing acrylic marking paint which is a lead and xylene free formulation, for use on concrete, tarmac, wood and composites.

Pocket sized makes it handy to use in many trades but especially in the construction industry for surveying and road marking.

AVAILABLE COLOURS:

- Black** (SKU: CP-PSSMPBL-A)
- Fluorescent Blue** (SKU: CP-PSSMPB-A)
- Fluorescent Green** (SKU: CP-PSSMPG-A)
- Fluorescent Orange** (SKU: CP-PSSMPO-A)
- Fluorescent Pink** (SKU: CP-PSSMPP-A)
- Fluorescent Purple** (SKU: CP-PSSMPPU-A)
- Fluorescent Yellow** (SKU: CP-PSSMPY-A)
- Red** (SKU: CP-PSSMPR-A)
- White** (SKU: CP-PSSMPW-A)

SKU: CP-PSSZA-A

PROSOLVE SILVER ZINC AEROSOL
500ml Spray Can

Sabre®

Good bonds last.

Technically Advanced Adhesives

Sabre partner with the best specialists around the world to create technically advanced products.

Many of Sabre product breakthroughs come directly from work with customers who need unique solutions for specific needs.

Compatibility Testing

Sabre provide comprehensive analysis of specific substrates, surface characteristics, and manufacturing and application requirements. Sabre conduct adhesion testing to test the compatibility of the adhesive to specific substrates, ensuring the best methods of bonding are recommended.

Mechanical Testing

Products are tested to destruction, analysing the mode of failure and bond strength characteristics. Procedures are designed to test tensile strength, shear strength, flexural strength to ASTM standards, as well as testing the mode of failure and optimum strength of the adhesive in particular customer applications.

Environmental Testing

Sabre conduct QUV accelerated weathering testing, reproducing damage caused by high heat, moisture etc. enabling them to review the effect of prolonged external exposure, and its impact on adhesive performance. This ensures their adhesives are fit for purpose to withstand the harshest environments.
