

# Orientation Clocks

A range of highly visible and easy to read clocks, aimed to assist dementia sufferers and those with cognitive impairment

Memory loss is often the first symptom to appear in someone suffering from dementia or other cognitive impairment. Use of orientation clocks may assist with this problem. These devices are suited to people with varying degrees of cognitive impairment with the need to be reminded of the day, time or date.

## Long Calendar Clock

This stylish, long rectangular calendar clock with extra large display can be wall mounted or placed on any flat surface.

Great for any room in the home, the clock has a large digital 'flip card' display that can still be read under fluorescent lighting (a common problem with clocks that use LCD or Liquid Crystal Display).

<b>CODE</b>	BQ38
