

In-surgery Dental Photographic Workshop

In your own practice

This course teaches the use of digital photography for modern day dental practice and delivers participants the theoretical information and techniques to achieve outstanding quality and consistent results.

You will be educated in the use of digital photography for dental practice and will be taken through photographic theory from the basics including choosing optimal equipment (DSLR, smart phone and/or compact) for your surgery to setting up the equipment with the correct settings along with techniques for consistent imaging and their safe storage.

We highly recommend that your auxiliary staff are educated in tandem as we encourage your practice to utilise their skills to be responsible for capturing most of your clinical records.

Topics covered:

- ▶ **Speed and accuracy** (medico-legal)
- ▶ **Get your image in focus**
- ▶ **Know your camera**
- ▶ **Clinical record taking**
- ▶ **Safe & fast storage**
- ▶ **Lets get hands on**

Courses are held in your own practice for a minimum of 3 hrs. Up to 4 CPD points available.

**INTRODUCE MEDICO-LEGAL
PHOTOGRAPHY AND
VIDEOGRAPHY INTO YOUR
TREATMENT PROTOCOLS**

Educator

Tammy Saville

Tammy Saville has spent over a decade as a professional photographer and graphic designer. Her early career in professional wedding and commercial photography led her to expand her skill set to multi-media commercials, arts, graphic design and marketing.

Tammy worked as a marketing manager in a world renowned dental company and was responsible for producing high quality educational imagery, specialising in clinical, facial and intra-oral dental and orthodontic photography.

Tammy's clinical photographs and cinematography have been published in dental journals, dental websites, dental educational text books and educational courses. She tutored clinical photography at the Invisalign accreditation courses in Australia from 2011-2013 and 2015-Present with 1122.
