Please ensure you do not undo the red lid, unless for cleaning purposes only. This has been tightened at the factory to ensure maximum pressure can be reached.

To fill the container: Unscrew the black plunger handle until it pulls out, pour spray mixture into the container, screw black plunger handle into the red lid until its firm and locks into the plunger sockets. Do not over tighten or use the black plunger handle and sockets to tighten the red lid. The sockets are not designed for this. If you unscrew the red lid for cleaning purposes tighten this by hand only.

If the black sockets are damaged this is not a warranty issue.

The timing of the repair may depend on the repair schedule and availability of the parts or components.
