

E-07+

ROAD **60** / **40** OFF ROAD

The E-07+ was developed with a goal to keep the tyre performance in line with increasingly powerful motorcycles and ever more demanding riders. The tread design is slightly more on-road oriented than the original E-07. Riders will enjoy its multi-functionality and durability. The E-07+ delivers an excellent off- and on-road riding performance. A bigger knobby design provides a plenty of open space between the tread blocks to displace sand, mud and water from the contact patch while keeping enough rubber between the road and the rotating tyre.

A variety of tests on different motorcycles and under different conditions confirmed that E-07+ is fully compatible with E-07. They can be fitted as a pair (e.g. E-07 front, E-07+ rear).

OEM APPROVED Mitas OE partners: Fantic Motor

DAKAR (yellow stripe): Tyre with a stronger carcass and higher puncture resistance. Suitable for higher loads, longer adventure trips and extreme conditions.

E-07

ROAD **50** / **50** OFF ROAD

When it comes to a true 50/50 adventure tyre, Mitas E-07 is one of the most desired choices among adventure riders, who love to combine comfortable road riding with more adventurous off-road getaways. Due to its hardwearing compound and optimal performance on- and off-road, the E-07 is a highly popular tyre for many road trips all around the world.

A variety of tests on different motorcycles and under different conditions confirmed that E-07+ is fully compatible with E-07. They can be fitted as a pair (e.g. E-07 front, E-07+ rear).
