## **ALL-PURPOSE CONCENTRATE DILUTION GUIDE**

**FLOORS:** Add 3oz of all-purpose concentrate to mop water. Clean as usual, and allow to dry.

**WALLS & WOODWORK:** Dilute 1/4 cup per 1 gallon of hot water. Clean, rinse and let dry.

**LAUNDRY:** Use about 1/3 cup per load – a little more for hard water. All-purpose concentrate may be neutralized by detergent residues in the machine so use enough to get the barest start of foam on top. You may have to use a little extra the first time. Always mix into warm water before adding the clothes. Softens clothes with natural aloe! Also has a mild whitening effect. Great for silks and fine fabrics, wool and suede (may darken).

**STAIN REMOVAL:** Safe and effective. Wet surface and apply full strength. Work into the material from several directions and let sit a moment. Rinse and dry.

**CARPETS:** Replaces detergent concentrates. Works well in all carpet cleaning machines and on stains.

**GENERAL CLEANING:** Stovetop, refrigerator, etc. Wet surface. Scrub with sponge saturated in Liquid Sunshine. Rinse and dry. For ALL water safe surfaces.

**BATHROOMS:** Use full strength on sponge and rinse. For all porcelain and tile surfaces.

**VEHICLES:** Saturate sponge with all-purpose concentrate. Work over vehicle in sections, wetting first, scrubbing and then rinsing. Always wash vehicles out of direct sunlight.
