

LS Coil Installation Instructions

1. Verify that the original coil form factor, mounting type and connector match the new Flame-Thrower coil.
2. Disconnect the spark plug wire from the coil tower.
3. Carefully disconnect the wiring connector at the coil. Connectors have locking tabs that must be depressed prior to removal. Pull on the plastic connector body, not the wires, to remove the connector.
4. Remove the two bolts that mount the coil and remove the original coil.
5. Install the Flame-Thrower coil in the same location. Reuse the factory bolts and tighten the coil in place.
6. Plug in the coil wiring connector. Apply dielectric grease to the opening of the spark plug boot and install the wire. The wire should snap into place.
