PRODUCT	BUILDER GEL	FAST & EASY BUILDER GEL	GUM GEL	HARD GEL	LEXAN GEL	3 IN 1 MAGIC GEL
	Sculpt to Perfection, Build with Ease.	Pour to Create, Fast and Convenient.	Shape Freely, Extend Without Limits.	Tough & Lasting, Compromise-Free Nails.	Set in Five, Shine Every Moment.	Triple Power, One Bottle Magic.
Features and Selling Points	Usually has a medium to high viscosity, ideal for extending, reinforcing, and sculpting (such as water ripples or shell nails), offering strong durability and longevity.	It comes with a function of base coat, eliminating the need for a separate base coat and saving on application time. Say goodbye to traditional light-cured extensions - equipped with its own brush, there's no need for a nail pen, making it easy to apply and shape quickly, perfect for swift procedures.	No need for paper forms, when used with nail molds, it allows for easy extension and shaping, bidding farewell to the intricate steps of traditional extension gel, simplifying the process for easy operation.	Designed for thin, brittle, and soft nails, it can strengthen the nails, fill uneven surfaces, shape, and sculpt.	With an extremely rapid curing time, it is suitable for high-efficiency work environments, reducing waiting times. Combining the functions of hard gel, builder gel, and decor gel into one versatile product, it caters to the convenience of manicurists.	A multifaceted product that can fulfill various nail art needs such as extensions, overlays, and intricate designs.
Differences	Compared to other forms of extension gels, the jar packaging allows for the use of larger quantities of the product for multiple applications or extensive coverage.	The extension length is limited, making it more suitable for quick repairs, construction, or beginners' use.	This unique shaping ability allows for form creation without support, providing professionals with more flexibility and creative space.	The texture is relatively thin, with less hardness compared to builder gel, allowing for only short extensions of around 1mm, primarily focusing on strengthening the nails.	Compared to other products that require longer curing times, the 5-second quickdry design significantly improves the speed and convenience of operations.	One bottle for multiple uses, eliminating the need to buy and use several specialized products, best exemplifying multifunctionality and convenience.
